Phạm Minh Thuận

FRONT-END DEVELOPER

(+84) 931 554 657 phamminhthuan912@gmail.com https://github.com/thuanpham00 https://mtp-dev.vercel.app/

OBJECTIVE

Software Engineering graduate with strong full-stack web development skills and a clear focus on front-end development. Awarded first prizes in faculty, university, and national-level scientific research competitions. Experienced in building real-world web applications using React, Next.js, and modern front-end technologies. Passionate about creating high-quality user experiences, writing clean and maintainable code, and continuously improving to deliver impactful products.

WORK EXPERIENCE

Công ty TNHH Giải pháp phần mềm NextIT 6/2025 - 12/2025

FullStack Developer Website

Developed website interfaces using ReactJS and TypeScript, and built/integrated backend APIs with NodeJS/NestJS. Handled data processing and created management features such as filters, shopping cart, import/export Excel, and price settings. Improved UI/UX and system performance. Worked with Backend and QA teams using Agile/Scrum, fixed bugs, refactored code, and explored basic AI applications for the product.

TECNHIAL SKILLS

Programming Languages	JavaScript, TypeScript, HTML5, CSS (SCSS), C, C#, Dart.
Frameworks/Libraries	React, NextJS, React-Router-Dom, React-Hook-Form, TanStack-Query, Redux-Toolkit, Zustand, NodeJS, ExpressJS, Fastify.
UI/UX Libraries	TailwindCSS, Shadcn/UI, Ant Design.
Database	MongoDB, SQL Server, Redis.
Technology	Websocket, Hls streaming.
Dev Tools	Prisma, Github, Postman, Docker, Swagger, Prisma, Firebase.

PROJECTS

E-Tech Shop 2/2025 - 12/2025

Description: A full-stack e-commerce platform for selling technology products such as computers, laptops, and accessories. The system includes a customer-facing website for browsing, ordering, and online payment, along with an admin dashboard for managing products, users, orders, inventory, and system analytics. It also features real-time chat support to enhance customer interaction and service efficiency.

Team size: 1 member

Responsibilities:

- Developed customer and admin interfaces using ReactJS with responsive design.
- Built product browsing, filtering, cart, checkout, and order tracking features.
- Designed RESTful APIs using Node.js (Express) and managed data with MongoDB.
- Implemented JWT authentication and role-based access control.
- Integrated VNPAY for online payments and AWS S3 for image storage.
- Built admin features for managing users, products, orders, and inventory.
- Implemented real-time chat (Socket.io) for customer–admin communication.
- Integrated email services (Resend) for notifications and account verification.

Technology Stack:

• **Front-End**: ReactJS, TypeScript, React-Router-Dom, React-Hook-Form, TanStack-Query, TailwindCSS, Shadcn/UI, Ant Design.
• **Back-End**: NodeJS, ExpressJS, MongoDB, JWT, WebSocket.
• **Deployment Tools**: Vercel (FE), VPS + Nginx (BE).
• **Infrastructure & Tools**: Docker, R2 Cloudflare (image storage), Resend (email service)
Github:
• **Front-End**: https://github.com/thuanpham00/E-TechShop
• **Back-End**: https://github.com/thuanpham00/TechZone-API

QRTable

12/2025 - 2/2026

Description: A full-stack restaurant management system that enables QR code-based table ordering, real-time order synchronization, and AI-powered food recommendations. The platform includes a Customer interface for seamless ordering via QR without login, and an Admin dashboard for managing tables, menu, orders, inventory, and business analytics. The system is designed with scalability, security, and real-time performance in mind.

Team size: 1 member
Responsibilities:

- Developed a full-stack restaurant system with Next.js 16, including Customer (QR ordering) and Admin Dashboard.
- Built responsive UI with SSR/SSG, real-time updates, and multi-language (i18n).
- Implemented QR-based table authentication and seamless ordering without login.
- Integrated AI chatbot (Groq API) for personalized dish recommendations.
- Designed RESTful APIs using Node.js (Fastify) and managed database with Prisma ORM.
- Built real-time order system using Socket.io with full lifecycle (Pending → Paid).
- Implemented JWT auth (refresh token rotation) and RBAC (Owner/Employee/Guest).
- Integrated payment (SePay), inventory management, and analytics dashboard.

Technology Stack:
• **Front-End**: NextJS, TypeScript, React-Hook-Form, TanStack-Query, Zustand, i18n, TailwindCSS, Shadcn/UI.
• **Back-End**: NodeJS, Fastify, Sqlite, JWT, WebSocket, Prisma ORM.
• **Deployment Tools**: Vercel (FE), VPS + Nginx (BE).
• **Infrastructure & Tools**: Docker, Prisma Studio
Github:
• **Front-End**: https://github.com/thuanpham00/QRTable
• **Back-End**: https://github.com/thuanpham00/QRTable-Restful-API

EDUCATION

Ho Chi Minh University Of Industry And Trade (2022 - 2026)

Major: Information Technology

GPA: 3.5/4.00

AWARD

First Prize – Student Scientific Research Competition (Faculty Level) 4/2025
Faculty of Information Technology, Ho Chi Minh City University of Industry and Trade
Recognized for the top research project at the faculty level, 2025.

First Prize – Student Scientific Research Competition (University Level) 5/2025
Ho Chi Minh City University of Industry and Trade, Faculty of Information Technology
Awarded for the best student research project at the university level, 2025.

Third Prize – Student Scientific Research Award (Ministry Level) 11/2025
Ministry of Education and Training – Vietnam
Awarded Third Prize at the national-level Student Scientific Research Competition organized by the Ministry of Education and Training, for the same research topic recognized with First Prize at both faculty and university levels.

SOFT SKILLS

• Problem Solving: Ability to identify problems and develop effective, optimal solutions.
• Communication & Presentation Skills: Ability to write documentation, train and present clearly and confidently in front of a crowd.
• English Reading Comprehension: Ability to understand technical documents and API documentation at a basic to intermediate level.
