Nguyễn Tuấn Anh

BACKEND DEVELOPER

0968010104 ngtuananh.1104@gmail.com https://gitlab.com/ngtuananh.1104 Nghệ An

OBJECTIVE

Backend Developer with hands-on experience in ASP.NET Core, Java Spring Boot, PostgreSQL, Redis, and Docker. Experienced in building RESTful APIs, authentication, real-time features, background jobs, and AI-integrated backend systems using pgvector for face recognition. Seeking a Fresher/Junior Backend Developer position to contribute to scalable and maintainable software systems.

SKILL

Backend	ASP.NET Core, .NET 8, RESTful API, Entity Framework Core
Database	MySQL, MariaDB, PostgreSQL (pgvector), Redis
Testing	xUnit
Architecture & Patterns	Clean Architecture, N-Layer Architecture, CQRS, MediatR, SOLID, DDD, Repository Pattern, Unit of Work
Others	Docker, GitLab CI/CD, Git, Swagger, Cloudinary, RabbitMQ, SignalR, Background Service

WORK EXPERIENCE

FPT Software 01/2025 - 06/2025

Backend Developer Intern

Project: Kindergarten Suggestion

- Developed and maintained web application features using Java and Spring MVC.
- Implemented CRUD functionalities for management modules.
- Participated in testing, bug fixing, and issue verification.
- Used Git for source code management and collaboration.
- Worked in an Agile/Scrum environment with developers and testers.

Tech: Java, Spring Boot, Spring MVC, JPA/Hibernate, MySQL, Maven, Gitlab

PROJECT

Childguard - School Bus Safety System 12/2025 - 05/2026

Backend Leader

Team: 5 members

Description: Built a school bus safety and attendance management system with real-time student tracking, pickup/drop-off verification, parental notifications, and risk-alert mechanisms to ensure safe transportation and regulatory compliance.

Responsibility:

Designed backend architecture using Layer Architecture to separate API, business logic, persistence, and shared components.

- Built RESTful APIs for school bus route management, trip execution, student attendance, staff attendance, and safety workflows.
- Integrated SignalR for real-time trip tracking, student status updates, and safety notifications.
- Integrated Python AI service for face embedding extraction using ArcFace and for plate recognition.
- Used PostgreSQL pgvector to store 512-dimensional face embeddings and perform similarity matching for student and staff face recognition.
- Applied CQRS with MediatR to separate commands and queries, improving maintainability and scalability.
- Implemented background jobs for email delivery, notification dispatching, and scheduled backend tasks.
- Developed an AI RAG chatbot provide role-based responses from knowledge base documents and system data.

Tech: ASP.NET Core, C#, Python, PostgreSQL, pgvector,FastAPI, Langchain Redis, SignalR, JWT Authentication, Cloudinary, Docker, GitLab CI/CD, ArcFace, OCR, AI-based Image Processing

Fconnect 05/2025 - 12/2025

Role : FullStack Developer

Team: 4 members

Description: Developed a full-stack marketplace platform for the FPT community, enabling users to buy, sell, manage products, process orders, make payments, chat in real time, and handle reports/feedback

Responsibility:

- Designed and established the Clean Architecture foundation for the backend system.
- Implemented authentication and role-based authorization with JWT for users.
- Implemented payment-related (SEPAY) workflows with webhook handling and real-time payment status updates.
- Built marketplace features including product management, cart, checkout.
- Developed an AI chatbot provide responses from knowledge base documents and system data.

Tech: ASP.NET Core, C#, Entity Framework Core, SQL Server, Redis, SignalR, JWT Authentication, Cloudinary, React, Vite, Tailwind CSS, Docker.

EDUCATION

FPT University 2022 - 2026

Bachelor of Software Engineering

GPA: 3.5/4.0

HONORS & AWARDS

Received a 70% full-program tuition scholarship by achieving a high ranking in the FPT University Scholarship Examination.	2022
Awarded by the Catholic Youth Committee of the Roman Catholic Diocese of Vinh to Catholic students with outstanding academic performance and active contributions to community and service activities	2026
