

Đặng Công Quân K

Java Developer

📞 [protected] ✉️ [protected] 📍 [protected]

MỤC TIÊU NGHỀ NGHIỆP

Results-driven Java Developer with proficiency in C# and Linux server administration. Leveraging a strong Computer Science foundation and practical experience in web application development, I excel at delivering scalable Java-based solutions for enterprise environments. Demonstrated success in implementing robust systems, automating server management, and optimizing application performance while consistently expanding technical expertise.

HỌC VẤN

FPT University (FPTU)

2023 - 2025

Bachelor

Software Engineering

UCSI University

Certificate

Advanced English Language Proficiency

KINH NGHIỆM LÀM VIỆC

FPT Information System (FPT IS)

Sep 2024 - May 2025

Fresher Developer

- Contribute to enterprise-level development projects utilizing Java and SQL Server
- Implement application features using Spring Boot and .NET frameworks

H2 COMPUTER CORPORATION (h2gaming.xyz)

Nov 2023 - Mar 2024

Server Hosting Manager

- Deployed and configured Linux-based gaming servers with optimal performance metrics
- Implemented LinuxGSM for efficient Steam game server management and scaling
- Maintained 99.9% server uptime while performing regular updates and security patches
- Enhanced server functionality through custom plugin development and integration

DỰ ÁN

Digital Platform - HD Bank

Sep 2025 - Now

Developer

System Design & Development: Contribute to the bank's digital transformation initiative by developing critical mobile banking features. Implement secure integration points between core banking systems, external services, and APIs. Write high-performance, maintainable code in Java and JavaScript that meets strict banking industry standards. Design and optimize PostgreSQL database schemas for efficient transactional processing. Execute comprehensive testing protocols to ensure system reliability and security compliance.

5P - CAFE CHÁT XÁM Startup Project

May 2025 - Now

Full-stack Developer

Architect and develop a complete web application system from concept to deployment. Frontend: Build responsive UI with ReactJS and Bootstrap, integrating react-router-dom and axios. Backend: Create RESTful API architecture using Spring Boot with Kotlin for business logic. DevOps: Configure containerized deployment with Podman on Ubuntu, implementing Nginx as reverse proxy. Infrastructure: Manage Cloudflare integration for DNS, HTTPS, and security optimization. Demo Website: <http://minetsbd.fun:82/> (temporary domain)

Aranya Mill-Stone

Dec 2024 - Mar 2025

Aurora MilkStoreDec 2024 - Mar 2025

Full-stack Developer

API Backend Development & Website Enhancement: Improved the API backend of the Moms and Babies Milk Store project, optimizing performance and functionality. Enhanced the website's user interface by implementing modern CSS and JavaScript effects for better visual appeal and interactivity. CI/CD & Deployment Automation: Established efficient coding and testing workflows by setting up Continuous Integration/Continuous Deployment (CI/CD) pipelines using GitHub Actions and Webhooks. Automated the deployment process by integrating GitHub activities with a physical Linux-based server for seamless updates. Domain Management & Security: Configured a custom domain and leveraged Cloudflare for enhanced security, ensuring robust TLS/HTTPS encryption and improved website reliability.

Time Keeping Management System URC Vietnam Co., Ltd.Sep 2024 - Now

Frontend Developer

Develop interactive frontend interfaces using TypeScript with TSX components. Ensure cross-browser compatibility and responsive design for enterprise application.

ERV - CUT HTMLSep 2024 - Now

Frontend Developer

Translate design specifications into pixel-perfect frontend components. Implement responsive layouts using HTML, CSS, and Bootstrap framework.

Moms and Babies Milk StoreMay 2024 - Jul 2024

Backend Developer

Engineered efficient API endpoints using ASP.NET MVC architecture. Optimized database interactions for minimal latency and maximum throughput. Collaborated with cross-functional teams to align backend capabilities with frontend requirements.

Counter Strike SharpJan 2024 - Sep 2024

Plugin Developer

Created custom plugins for Counter-Strike 2 servers using C# and CounterStrikeSharp framework. Debugged and optimized existing codebase to enhance gameplay experience. Contributed to open-source gaming community through GitHub repository contributions. GitHub: github.com/roflmuffin/CounterStrikeSharp

Web Hosting Provider for Student Projects

Hosting Services Provider

Provisioned and maintained web hosting infrastructure for student development projects. Managed Ubuntu-based server environments with custom domain configurations. Implemented Cloudflare services for enhanced security, caching, and performance optimization.
