MỤC TIÊU NGHỀ NGHIỆP

.NET Backend Developer with over 1.5 years of experience in software development, specializing in building APIs and enterprise applications. Focused on writing clean, scalable code and delivering high-quality solutions that meet business requirements.

HỌC VẤN

The University of Foreign Languages, Information Technology	2020 - 2022
Bachelor	
Software Engineering	
Ho Chi Minh University of Technology	2016 - 2022
Bachelor	
Information Technology	

KINH NGHIỆM LÀM VIỆC

COZWORK JOINT STOCK COMPANY	10/2024 - 05/2026
Software Engineer	
- Developed backend APIs and database solutions using ASP.NET Core and PostgreSQL, and contributed to React (TypeScript) frontend development for enterprise applications - Improved API response time by approximately 30-40% and reduced database load by implementing Redis caching for high-frequency business data and session management workflows - Used RabbitMQ (MassTransit) to offload long-running tasks, reducing API wait times and improving background processing throughput by approximately 40% - Developed distributed background job processing using Quartz.NET to automate notifications, scheduled synchronization, recurring workflows, and email processing tasks - Built AI-integrated backend features using Gemini, Ollama LLMs, RAG architecture, and PostgreSQL vector search to support semantic document retrieval and intelligent search capabilities - Developed audio-processing and content moderation pipelines in Node.js, integrating AmiVoice Speech-to-Text APIs to process 1,000-3,000 WAV audio files daily for transcription analysis and compliance monitoring workflows - Implemented a self-hosted PHP Laravel Reverb WebSocket server to replace Pusher, reducing third-party service costs and dependencies - Implemented centralized logging and monitoring using Serilog and Seq, improving production issue tracing and reducing debugging and incident investigation time - Integrated external platforms including Firebase Cloud Messaging, Google Drive API, and third-party communication services for notification delivery, file management, and messaging synchronization - Maintained Linux-based deployment and processing environments using Docker, Nginx, PM2, cron jobs, and NAS storage systems for internal services and scheduled processing workflows	
VIET TECHNOLOGY TECHNICAL SOLUTION SERVICE COMPANY LIMITED	03/2024 - 06/2024
System Administrator	
Maintained enterprise infrastructure including HPE servers, network systems, file-sharing services (SMB/FTP/WebDAV), and internal technical support operations
