

# Lý Hữu H

.NET Developer

📞 [protected]    ✉ [protected]    📍 [protected]

## CAREER OBJECTIVE

.NET Developer with 3+ years of professional experience, focused on building and maintaining ASP.NET Core Web APIs and microservices. Strong expertise in Entity Framework Core, Clean Architecture, and CQRS, delivering scalable and maintainable back-end solutions. Worked with Angular, Vue, Blazor, and WinForms at a supporting level for feature implementation and bug fixing in production projects. Experienced in integrating third-party services and optimizing system performance, with hands-on contributions to both new development and legacy system maintenance.

## EDUCATION

## WORK EXPERIENCE

**Schooloutfitters Viet Nam - Ho Chi Minh** Nov 2024 - Present

### Software Developer

- Tech stack: .NET Framework, .NET Core, WinForms, Vue2/3, SQL Server, Stored Procedures
- Maintained and enhanced internal business applications using .NET Framework + WinForms, delivering bug fixes and small feature updates to support daily operations
- Worked extensively with SQL Server and Stored Procedures, building queries and reports, and improving performance of legacy modules
- Contributed to internal web applications using .NET + Vue2/3, implementing UI changes, bug fixes, and feature updates for smoother and better user experience
- Delivered software updates through ticket-based tasks, ensuring stable releases and business continuity

**Schooloutfitters Viet Nam - Ho Chi Minh** Nov 2024 - Apr 2025

### Software Developer (Outsource Project)

- Tech stack: Angular, .NET Core Web API (exposure), SQL Server, PrimeNG, Primeflex, Material UI
- Focused primarily on Front-end development with Angular, implementing UI components and pages using Material UI and PrimeNG for consistent design and usability
- Integrated front-end modules with .NET Core Web API services provided by the back-end team, ensuring smooth data flow and feature functionality
- Contributed to improving user interactions and responsiveness, enhancing overall user experience
- Delivered features on schedule, helping the team meet client requirements and project deadlines

**K.System and Solutions - Ho Chi Minh** May 2022 - Dec 2023

### .NET Developer

- CVAT Adaptation (overlapping 2023, short-term): Customized the Computer Vision Annotation Tool (CVAT) open-source project to meet company requirements. Added new features for internal use
- Task Tracking System (06/2023 - 12/2023): Developed APIs and features in .NET Core WebAPI + React, including task creation, automated task completion with IHostedService, and employee ranking. Implemented data export to Excel and folder-tree structures, improving reporting and productivity for end users
- Data Migration Project (02/2023 - 06/2023): Designed migration and processing tools in .NET Core MVC, transforming client datasets for computer vision training. Built automated task creation and NAS integration features, while enhancing UI with Bootstrap + jQuery for smooth data handling
- HRM Project (05/2022 - 12/2022): Maintained and expanded the MRP module for employee asset management using ASP.NET Core MVC + Razor Pages. Improved tracking of devices and accessories, reducing data errors and increasing accountability

## PROJECTS

### E-commerce Microservice App

- In development

#### Full-stack Developer

Built a distributed system for selling electronic devices using Microservices, CQRS, EF Core, MassTransit-RabbitMQ, YARP, gRPC. Includes Catalog, Ordering, Discount, Cart, and Admin services

### Car Auction App

#### Full-stack Developer

Developed an auction platform with Microservices, Duende IdentityServer, EF Core, MassTransit-RabbitMQ, gRPC, Next.js, MongoDB, Postgres. Supports user registration, bidding, and real-time search

### Angular E-commerce App

#### Full-stack Developer

Created a web store for sports clothing with Angular, ASP.NET Core Web API, EF Core, Postgres, Stripe API. Implemented authentication via ASP.NET Core Identity. GitHub: [github.com/laihuyha/AngularNetCoreWebApp](https://github.com/laihuyha/AngularNetCoreWebApp)
