

Nguyễn T P

Full Stack Developer

📞 [protected] ✉ [protected] 📍 [protected]

CAREER OBJECTIVE

Final-year Software Engineering student with strong skills in Fullstack development (.NET Core, React, SQL Server). Seeking an internship/fresher position to apply knowledge, gain real-world experience, and contribute to production projects.

EDUCATION

Ho Chi Minh City University of Foreign Languages and Information Technology (HUFLIT) Oct 2022 - Present
Bachelor
Information Technology

WORK EXPERIENCE

PROJECTS

Team Task Management System (.NET & React) Jun 2025 - Aug 2025
Team Lead & Full-Stack Developer

Led a team of 4 members to deliver a full-stack task management application within a 3-month timeframe, overseeing the entire development lifecycle from design to initial deployment. Backend (.NET Core & SQL Server): Architected and built a secure RESTful API with ASP.NET Core 8, developing over 35 endpoints for all CRUD operations, all protected by JWT-based authentication. Engineered a normalized database schema with 15+ tables in MS SQL Server, managing all data access and complex many-to-many relationships using Entity Framework Core 8. Developed core business logic for advanced features, including a per-project customizable Kanban board status system and a flexible user/team invitation model via unique keycodes. Frontend (React & TypeScript): Developed a dynamic Single Page Application (SPA) with React and TypeScript, creating over 30 reusable components and 7 core application views (Dashboard, Kanban, Calendar, etc.). Improved user workflow by implementing a seamless drag-and-drop interface for task management using @dnd-kit, reducing the steps to update a task's status by an estimated 50%. Handled all asynchronous state and data fetching across the application by integrating Axios with React's Context API, ensuring consistent UI-state synchronization.

E-commerce Website 'Leather Notebooks Shop' Dec 2024 - Mar 2025
Full-Stack Developer

Solely designed, developed, and managed a complete e-commerce platform from concept to completion, demonstrating full end-to-end project ownership. Built a robust, server-side application using the ASP.NET MVC 5 architecture, developing 10+ controllers to handle all business logic, from product catalog management to a complete checkout process. Designed and managed a relational database in MS SQL Server with over 10 tables, utilizing Entity Framework 6 (Database First) to perform all data access and CRUD operations. Developed a responsive user interface for both customers and administrators using HTML5, Bootstrap, and jQuery, delivering 15+ distinct views including a full shopping cart, order management, and a comprehensive admin dashboard.

SKILLS

Programming Languages & Frameworks	C#, TypeScript, JavaScript, .NET Core (ASP.NET Core, ASP.NET MVC), React, Entity Framework, HTML5/CSS3, Tailwind CSS, Bootstrap, jQuery
Tools & Technologies	Git, GitHub, Microsoft SQL Server, Firebase Firestore, Swagger, Axios, React Router
Technical Skills	Backend Development, Frontend Development, RESTful API Design, MVC Architecture, Database Design, Single Page Application (SPA) Development

Soft Skills

Project Management, Team Leadership, Effective Communication, Problem Solving, Time Management, Analytical Thinking

ADDITIONAL INFORMATION

GPA: 3.0. Expected Graduation: Jul 2026. Strong foundation in both backend and frontend development with practical experience in building complete web applications.
