

DANG TRINH NHAT HA

Senior QC Engineer

PROFESSIONAL SUMMARY

Senior QC Engineer with 8+ years of experience driving quality assurance across web, mobile, ERP, and IoT solutions. Proven expertise in test strategy, delivery management, defect governance, stakeholder collaboration, and team mentoring. Strong background in web, mobile, API, integration, and database testing.

CORE SKILLS

Test Management	Strategy, planning, execution, release readiness
Quality Engineering	Requirements analysis, defect management, quality metrics
Testing	Web, mobile, API, integration, database
Agile Delivery	Agile/Scrum, stakeholder management, cross-functional collaboration
Leadership	Team mentoring, risk management

PROFESSIONAL EXPERIENCE

ENGMA JSC — Senior QC Engineer | Apr 2018 – Present

- Led QA delivery across 5+ concurrent projects, covering test strategy, execution, defect management, and release readiness.
- Improved quality processes through standardised QA practices, documentation, and reporting.
- Mentored junior QC engineers and collaborated with Product Managers, Developers, and stakeholders to manage risks and prioritise defects.

Felix — eCommerce Platform | 2019 – Present

- Delivered end-to-end testing across mobile, web, POS, and seller platforms.
- Designed and executed 300+ test cases covering functional, regression, exploratory, and cross-browser testing.
- Contributed UI/UX improvements to enhance customer experience and usability.

Five2One — Asset Management Platform | 2024 – Present

- Validated booking, rental, and service management workflows across web and mobile applications.
- Identified 40+ defects prior to release, improving product stability and release readiness.

Hera Trading — Automotive Platform | 2024 – Present

- Tested vehicle sales, rental, and showroom workflows across mobile and web platforms.
- Validated GPS integration and end-to-end business processes.

Education & Healthcare Platforms | 2025 – 2026

- Validated role-based access, scheduling, booking, and notification workflows across web and mobile applications.
- Performed functional, integration, and user acceptance testing to support successful releases.

ERP & IoT Solutions | 2021 – 2023

- Tested customised ERP modules and IoT device integrations, ensuring alignment with business requirements.
- Supported production deployments through comprehensive functional and integration testing.

Earlier Experience — QC Engineer | Jan 2017 – Feb 2018

- Delivered QA for enterprise, eCommerce, IoT, and service platforms, performing functional, regression, and integration testing.
