

NGUYEN MAI LAN

DIGITAL TRANSFORMATION, PRODUCT & PROJECT MANAGER | BANKING • FINTECH • PROPTech

Transforming customer journeys into practical digital products that create sustainable business value.

EXECUTIVE PROFILE

Digital Transformation, Product Strategy and Project Leader with 20+ years of experience delivering enterprise technology products across Banking, FinTech and PropTech. Successfully contributed to more than 30 strategic initiatives, leading cross-functional teams and collaborating with global technology partners including IBM, Oracle, Temenos, AWS, Google Cloud and Newgen, etc. Led teams of up to 16 people and cross-functional enterprise programs involving over 100 contributors.

Combining deep expertise in Banking, Digital Transformation and Real Estate business processes, I specialize in transforming complex customer journeys into practical digital products that create measurable business value.

Recognized for bridging business, technology and operations, aligning stakeholders and redesigning business processes to improve customer experience, operational efficiency and organizational performance.

I believe exceptional products are created when people, technology, finance and execution work together to solve real-world problems while my role is to connect these perspectives, build consensus among stakeholders and deliver practical solutions that people trust and organizations can successfully operate.

SELECTED DOMAIN EXPERTISE

Enterprise SaaS & Platform Solutions

PROFESSIONAL EXPERIENCE

Career Break | Hanoi, Vietnam

Aug 2025 – Present

- Took a planned career break to manage a family health situation; remained engaged with banking, technology and product trends and is now fully ready to return to work.
- Providing trade finance solution advisory services to a FinTech/BankTech company serving Big 4 banks and numerous other banks in Vietnam.
- Recently invited to take on the role of Head of the Product, Delivery and Capability Development Division of more than 10 members within a company of nearly 100 employees.

Product Director | TNTECH - Products & Partnerships

Mar 2025 – Aug 2025

- Owned product planning and solution shaping across BankTech, FinTech and PropTech portfolios (ProTech products include Smart Industrial Park Management, Smart Building Management, Environmental Monitoring and Construction Project Management solutions).
- Led customer discovery with approximately five enterprise and institutional clients - including TNR, an environmental monitoring authority and members of the Vietnam Real Estate Association - covering user needs, workflows and opportunities for both existing and new-build products.
- Directly managed five team members during coordinating 20-30 contributors across product, engineering, implementation, sales, partners and customer teams, including international solution providers.
- Worked end to end from needs assessment, solution design and feature recommendations through demonstration, proposal, pricing and implementation planning; advanced the new Environmental Monitoring product to demo and commercial-quotation stage.
- Built product-management and operating processes and professional playbooks spanning discovery, solution design, delivery, sales, marketing and customer service.
- Helped define commercial offerings and go-to-market approaches for enterprise digital solutions.

Demand Manager | SHB Bank - IT Division

Apr 2024 – Mar 2025

- Directly managed a four-person demand team and coordinated 20-30 Vietnamese and international stakeholders across business, technology and vendor organizations.
- Engaged end users across the bank to uncover needs, evaluate demand and recommend new solutions or product improvements; established assessment criteria, dashboards and governance reporting for prioritization and delivery visibility.
- Facilitated portfolio prioritization and annual roadmap planning, aligning business value, user needs, technology capacity and vendor options.
- Designed and standardized Demand-to-Delivery governance, improving prioritization, collaboration and transparency between business and technology organizations.
- Served as an IT relationship focal point and helped organize division-wide engagement events for more than 200 employees.

Project Manager | SHB Bank - IT Division

Dec 2022 – Apr 2024

- Joined Core Banking (all modules), RLOS and ERP initiatives from inception, contributing to tendering, requirements discovery, solution and vendor evaluation, implementation governance and cross-functional operating processes.
- Directed delivery across discovery, solution architecture, BRD, SIT, UAT, pilot, integration, data migration, go-live, training and handover; large programs involved 20 to 100+ contributors as Core Banking project and many multiple international vendors.
- Owned plans, milestones, risks, issues, change control, quality, governance reporting, vendor coordination, commercial discussions and payment procedures.

Deputy Director / Operations Manager | TTAH Architecture & Construction JSC

Jul 2013 – Oct 2022

- Joined an unstructured two-person business and helped build it into an approximately 20-person organization, directly managing 16 employees across operations, customer service, sales, administration and delivery.
- Built from zero the productized service portfolio for architectural consultancy, construction, interior/exterior design and fit-out, including value propositions, service packages, pricing and customer-facing materials.
- Designed end-to-end online and offline customer journeys - from lead generation, consultation and quotation through contracting, design, construction, handover, warranty and after-sales service.
- Established operating and governance processes, sales and customer-service channels and the company's protected brand identity, contributing to annual revenue of VND 12–15 billion and an approximately 30% profit margin.
- Designed and standardized service delivery processes that significantly improved customer satisfaction, operational consistency and project execution efficiency.
- Designed and standardized end-to-end service delivery processes that transformed fragmented operations into scalable business workflows.

Real Estate Consultant | MSH Group / SVH Group

Jul 2013 – May 2021 (concurrent / project-based)

- Developed deep domain expertise across the end-to-end real estate transaction lifecycle, including project legal review, reservation, deposit, customer consultation, sales operations and after-sales services.
- Worked closely with developers, sales teams and customers to identify operational pain points and improve transaction workflows, building a strong foundation for future PropTech product design.
- Built first-hand understanding of customer decision-making throughout the home-buying journey, from project evaluation to transaction completion.
- Directly advised clients on investments in real estate projects marketed by the company. Consistently recognized as a top performer, achieving annual sales exceeding VND 10 billion, with transaction values ranging from VND 800 million to VND 1.8 billion per deal.

Senior Executive Officer | VIB - Trade Finance

2003 – 2005 and Apr 2011 – Jul 2013

- Controlled trade-finance operations across letters of credit, collections, remittances and guarantees, linking deep transaction-domain expertise with Core Banking and e-LC product development.
- Advised corporate customers on international payments, contracts, Incoterms, transport, foreign exchange and financing, strengthening understanding of complex, regulated customer journeys.
- Supported operational control and product/process improvement for Trade Finance modules while coordinating branches and stakeholders across the bank.

Team Leader / Business Analyst / Project Coordinator | VIB - IT Division

Apr 2005 – Jul 2011

- Directly managed a 10 person team and coordinated 10-15 Vietnamese and international specialists across E-banking, Core Banking, CRM, loan origination and document-management initiatives, etc.
- Independently led enterprise-wide Document Management transformation from vendor selection through implementation, go-live and bank-wide adoption. It helped to improved operational efficiency by reducing document retrieval time by 90%, significantly reduced printing and physical storage costs, and enabled secure enterprise-wide digital document management.
- Built E-banking service and customer experience processes and joined the Core Banking Trade Finance module from inception, contributing to implementation governance, coordination, testing and product development. Contributed to Trade Finance e-Banking modules, payment card services and digital customer products, supporting product rollout, customer adoption and nationwide business-unit training.
