

Pham Gia Khang

Backend Developer | Java Spring Boot, MySQL, REST API

Ho Chi Minh City | gia.khang.cv04@example.com | github.com/khang-java-api

PROFESSIONAL SUMMARY

Backend-focused developer with Java Spring Boot, MySQL, REST API, and Git experience. Does not show required frontend framework experience such as React.js, Vue.js, or TypeScript and has no responsive UI/data visualization evidence.

TECHNICAL SKILLS

- Java, Spring Boot, REST API, MySQL, Git
- Basic HTML/CSS for admin templates only
- No React.js, Vue.js, or TypeScript project experience
- No D3.js/Chart.js or dashboard frontend implementation

EXPERIENCE

Junior Backend Developer - APIWorks, 2024 - Present

- Created REST endpoints for inventory and user management modules using Java Spring Boot.
- Designed MySQL tables and wrote SQL queries for business reports.
- Used Git branching and code review process with backend team.
- Consumed by frontend team but did not implement the frontend UI.

PROJECTS

- Inventory API - Java Spring Boot, MySQL, JWT authentication.
- Order Management API - CRUD endpoints and database schema design.

EDUCATION

B.S. in Computer Science - FPT University, 2024
