

DANG NGUYEN DANG KHOI

Location: Ho Chi Minh City

BACKEND DEVELOPER

ABOUT ME

Backend Developer with 2+ years of experience in designing, developing, and maintaining server-side systems using Node.js and NestJS. Experienced in building RESTful APIs, integrating third-party services, and working with multiple database systems (PostgreSQL, MySQL, MongoDB, Azure Cosmos DB). Have worked with international clients (US, Japan) and cross-functional teams in Agile environments.

SKILLS

Core Backend (Expertise) Node.js, NestJS, JavaScript (ES6+), TypeScript, RESTful API Design

Databases & Caching PostgreSQL, MySQL, Azure Cosmos DB, MongoDB, Firebase

Real-time & Messaging Server-Sent Events (SSE), Firebase Cloud Messaging (FCM)

Other Frameworks & Tools Laravel, FastAPI, ASP.NET, React, Vue.js, AWS S3, Minio, Jest Test, Gauge Test, PHPUnit

WORK EXPERIENCE

Backend Developer / Fullstack Developer

Sunshine Software

Jan 2024 – Present

Project: Daily Option Profit - U.S. Stock Signals (Apr 2025 – Present)

Technologies: NestJS, NodeJS, Firebase, Azure Cosmos DB, PostgreSQL | **Team Size:** 10

- Architected and implemented high-performance backend core services for a financial stock platform.
- Developed modules including Trade Signal, Ledger Entry, Earning, Stock Ranking, Search Symbol, AI Sentiment, and Watchlist.
- Utilized NestJS for structured client-facing API development and NodeJS for background signal processing tasks.
- Managed robust multi-database integration using Azure Cosmos DB and PostgreSQL alongside Firebase real-time sync.

Project: Roomrise PMS (Property Management System) (Sep 2025 – Dec 2025)

Technologies: NestJS, MySQL, Firebase Cloud Messaging, Channex API | **Team Size:** 3

- Engineered core features for a centralized accommodation and OTA channel management platform.
- Developed backend modules for Dashboard, Report, Chat Message, Notifications, Booking, Calendar, and FOH (Front of House).
- Implemented a dynamic permission system to handle access control securely across modular application interfaces.
- Integrated Channex API for channel manager synchronization and Firebase Cloud Messaging for real-time alerts.

Project: Cloud Sign - Questar Japan (Dec 2025 – Present)

Technologies: Laravel (API + MVC), React, Jest Test, Gauge Test, AWS S3, MySQL | **Team Size:** 4

- Developed a high-availability system for real-time management of IoT devices and digital signage content displays for construction sites in Japan.
- Built enterprise-level APIs and designed responsive web components utilizing React.js for the main interface platform.
- Enforced high system reliability and test coverage by implementing comprehensive automated test suites using Jest Test and Gauge Test frameworks.
- Managed media storage pipelines and asset delivery using AWS S3.

MY ROLE

- **Backend Engineering & API Design:** Specialized in building enterprise-grade, modular, and secure RESTful APIs using NestJS and Node.js.
- **Database Architecture Management:** Experienced in handling relational (PostgreSQL, MySQL) and NoSQL (Cosmos DB, MongoDB) architectures for data intensive environments.
- **Third-Party Integrations & Quality Assurance:** Dedicated to connecting global channel infrastructure (Channex API), real-time messaging protocols, and cloud storages. Ensured high software quality through continuous integration and testing using modern frameworks (Jest, Gauge, PHPUnit).

EDUCATION

BTEC + BSC HONS IN COMPUTING PROGRAM

University of Greenwich

July 2021 - November 2024

ENGLISH PREPARATION

University of Greenwich

September 2020 - June 2021

HONORS & AWARDS

Top 3 Student Computing

University of Greenwich

November 2024

The Best Student of The Subject: Data Structures & Algorithms

University of Greenwich

June 2023
