EDUCATION

University of Information and Technology - VNUHCM
Software Engineer

Ho Chi Minh City, Vietnam
Expected 2026

- **Specialization:** Web and App Development

TECHNICAL SKILLS

- Languages: **Java, JavaScript, C/C++, HTML/CSS, Kotlin**
- Databases: **MySQL, FireBase, Spaces (DigitalOcean)**
- Frameworks and Tools: **SpringBoot, Android SDK, React, Vite, Ant Design**
- Version Control and Project Management: **Git, Trello**
- DevOps: **Ubuntu Server, nginx, systemd, SSH, VPS (DigitalOcean).**

CERTIFICATIONS

- Toeic Listening & Reading : **780**
- Toeic Speaking & Writing: **250**

PROJECTS

Vocalearn - Online English Vocabulary Learning

04/2025 - 06/2025

- **Description :** A web application for English vocabulary learning using flashcards, smart auto pronunciation conversion, and mock TOEIC tests (Listening & Reading). The platform also provides an administrative dashboard to manage users, content, and system activity.
- Team size: **2** - Position: **FullStack**
- Designed database schema using **MySQL Server**, integrated **Spaces cloud storage** for storing media files. Developed **RESTful APIs** using **Jwt** to handle client requests. Wrote API documentation.
- Designed and implemented customer-facing UI using **ReactJS** and **Ant Design**.
- Deployed static web and backend service on Ubuntu server. Configured **nginx** and **systemd** for routing and auto-restart.

Chess Online App

05/2025 - 07/2025

- **Description:** A mobile application for playing online chess with multiple modes: PvP, PvE (AI), offline, and customizable settings (e.g., piece emotes, critical hit chance).
- Team size: **4** - Position: **Backend**
- Implemented real-time communication using **WebSocket** (room creation, matchmaking, in-game data). Integrated **Firebase Authentication**.
- Deployed backend with nginx and systemd on server.

Clinic Management

11/2024 - 01/2025

- **Description:** A web-based system for managing clinic operations, including employee, patient, and prescription data. Implemented core features such as prescription handling, appointment scheduling, and statistical reporting.
- Team size: **4** - Position: **Frontend**
- Built patient and staff management interfaces using **React + Vite**. Connected to RESTful APIs via fetch for data processing.
