Github: github.com/mikeethanh

Location: Ha Noi, Viet Nam

Education

University of Transport and Communucations (UTC)

Bachelor of Science in Information Technology- International Training Program

Graduation Date: 6/2026

GPA: 3.3/4

Technical Skills

- **Languages & Frameworks:** Python, NumPy, PyTorch, LlamaIndex, FastAPI
 - **Machine & Deep Learning:** Regression, KNN, Random Forest, XGBoost, Gradient Boost, CNN, RNN, Transformers Architecture
 - **LLMs & NLP:** Fine-tuning (SFT, LoRA), Reinforcement Learning (GRPO), Agentic RAG, Hybrid Search, Evaluation Metrics (ROUGE, BLEU, Perplexity)
 - **MLOps:** Docker, CI/CD(GitHub Actions), Cloud deployment(DigitalOcean), Vector DB(Qdrant), Redis, Celery
-

Projects

Vietnamese Legal Chatbot RAG System(NLP Project)

- **Link project:** <https://github.com/mikeethanh/Vietnamese-Legal-Chatbot-RAG-System.git>
- **Model:**<https://huggingface.co/mikeethanh/vietnamese-legal-llama3.2-3b-merged-sft-v1>
- **Architecture:** Microservices system using FastAPI, Celery, Redis to handle asynchronous tasks.
- **Domain-specific:** Fine-tuned(SFT) Llama-3.1-8B. Achieved performance: reduced Perplexity from 7.92 to 2.63, improved ROUGE score by 15% compared to the base model.
- **MLOps:** Deployed with Docker on DigitalOcean, using H100 GPU for serving, monitored with Prometheus/Grafana.
- **Advance RAG:** Agentic RAG pipeline with LlamaIndex, featuring Hybrid Search ,Cohere Reranker, and specialized Legal Calculation Tools.

Supervision for Online Learning (CV Project)

- **Link project:** <https://github.com/mikeethanh/Supervision-for-Online-Learning.git>
 - **Identity Verification:** Developed a real-time facial recognition system using CNN architectures to verify student identities.
 - **Security & Anti-Spoofing:** Implemented MobileNetV2 to detect impersonation attempts ,achieving a 92% accuracy on a 5,000 image dataset.
 - **Architecture Optimization:** Enhanced model generalization by using Batch Normalization and Dropout layers, ensuring robust performance.
-

Certifications & Awards

- **TOEIC(4 Skills)**
 - Listening & Reading: 780 (Valid until Aug 23, 2025)
 - Speaking & Writing: 270 (Valid until Dec 17, 2026)
- **Third Prize- Scientific Research Competition**
 - Awarded for there search project "Supervision for Online Learning", which applied Deep Learning models for automated attendance tracking and student behavior analysis.
- **Completed an AIO course(2024) from AIVIETNAM.**
- **Completed an DS/AI(2025) from Full Stack Data Sciene.**
