

Nguyen Minh Khang

Full Stack Developer - Golang, SvelteJS, PostgreSQL

Ho Chi Minh City, Vietnam | khang-nguyen@example.com | +84 900 000 000 | github.com/khang-nguyen | portfolio.example/khang-nguyen

PROFESSIONAL SUMMARY

Full Stack Developer with 3.5 years of experience building SaaS platforms using Golang, SvelteJS, TypeScript, PostgreSQL, Redis, RESTful API, gRPC, JWT/OAuth2 and WebSocket. Strong background in microservice architecture, micro-frontend development, healthcare workflow modules and multi-tenant product design.

CORE SKILLS

Backend: Golang, Gin, Echo, RESTful API, gRPC, JWT/OAuth2, WebSocket, Redis, worker queues
Frontend: SvelteJS, TypeScript, SvelteKit, React basic, Tailwind CSS, micro-frontend module design
Database: PostgreSQL schema design, query optimization, indexes, transactions, migrations
Architecture: Microservice Architecture, multi-tenant SaaS, design patterns, clean architecture, API security
Tools: Git, Docker, CI/CD collaboration, Jira, Slack, Postman, Grafana basic

WORK EXPERIENCE

Full Stack Developer | MedCore SaaS Vietnam | 01/2022 - Present

- Developed patient reception, appointment, clinic billing and report modules for a multi-tenant healthcare SaaS platform.
- Built Golang RESTful API and gRPC services handling patient records, queue management, payment events and report aggregation.
- Implemented JWT/OAuth2 authorization, role-based access control and WebSocket notifications for real-time clinic workflows.
- Optimized PostgreSQL queries and indexes, reducing average dashboard response time from 2.4 seconds to 900 milliseconds.
- Built SvelteJS micro-frontend modules with reusable components and Tailwind CSS, improving feature delivery speed by 25%.
- Integrated external HIS/LIS-style endpoints and payment callback workflows with retry logic and audit logs.

Junior Full Stack Developer | CareFlow Tech | 07/2020 - 12/2021

- Maintained Go services and frontend dashboard features for clinic operation reporting.
- Created PostgreSQL stored queries, migration scripts and API documentation for QA and DevOps teams.
- Collaborated with UI/UX, QA and DevOps to release features on a two-week sprint cycle.

PROJECTS

Multi-tenant Clinic Management Platform

- Stack: Golang, SvelteJS, PostgreSQL, Redis, RESTful API, gRPC, WebSocket, Docker.
- Designed module workflow for reception, examination, pharmacy inventory and finance reports.
- Used Redis caching for frequently accessed tenant configuration and dashboard metrics.

EDUCATION

B.S. Software Engineering - University of Technology, 2020

LANGUAGES

English: Working proficiency | Korean: Basic reading
