

Vo Minh Tri

Go Web Engineer

Ho Chi Minh City, Vietnam | tri-vo@example.com | +84 900 000 000 | github.com/tri-vo | portfolio.example.com/tri-vo

SUMMARY

Engineer with 2.7 years building services in the Go programming language and browser applications using modern ECMAScript tooling. Uses Postgres, token-based login, real-time socket updates and in-memory caching. Terminology intentionally uses aliases instead of exact JD keywords.

SKILLS

Go programming language, SvelteKit, modern JavaScript framework, Postgres database, HTTP JSON endpoints, remote procedure calls, token-based authentication, access delegation, real-time sockets, in-memory cache, distributed services, modular frontend shells, source control

EXPERIENCE

Go Web Engineer | HealthOps Platform | 08/2023 - Present

- Built HTTP JSON endpoints and remote procedure calls for appointment, inventory and billing workflows.
- Used Postgres indexes, transaction isolation and query plans to improve report speed.
- Implemented token-based login and delegated access for clinic users.
- Added real-time socket updates for patient queue screens and cached tenant settings in an in-memory store.

Frontend Developer | Internal SaaS Team | 09/2021 - 07/2023

- Built SvelteKit UI screens and reusable form components for a multi-tenant admin portal.
- Contributed to modular frontend shells and independent release packages.

EDUCATION

B.S. Computer Engineering - 2021
