

Tran Khanh Vy

Full Stack Developer - Complex Layout CV

Ho Chi Minh City, Vietnam | vy-tran@example.com | +84 900 000 000 | github.com/vy-tran |
portfolio.example/vy-tran

This CV intentionally uses tables and non-standard section order to test parsing robustness.

PROFILE MATRIX

Primary stack	Golang / SvelteJS / PostgreSQL	API	REST + gRPC + JWT
Systems	Micro-frontend / Microservice / Redis	Domain	Clinic SaaS + billing workflow
Risk	Uses mixed tables and non-standard section order	Parsing	Complex format test

TIMELINE + WORK EVIDENCE

Period	Role	Stack	Evidence
2023-2026	Full Stack Engineer	Go / Svelte / Postgres	Built tenant settings, reception workflow, report API
2021-2023	Frontend Developer	Svelte / TypeScript	Reusable component library and micro-frontend shell

Selected Responsibilities

- Built backend services using Golang and RESTful API for clinic appointment modules.
- Created SvelteJS micro-frontend pages with responsive layout and shared design components.
- Used PostgreSQL indexes and query review to reduce report latency.
- Worked with QA and DevOps in release testing and incident resolution.

DENSE SKILLS BLOCK

Golang | SvelteJS | TypeScript | PostgreSQL | RESTful API | JWT/OAuth2 | Redis | WebSocket | gRPC |
Microservice Architecture | Micro-Frontend | Design Pattern | Product Mindset

EDUCATION

B.S. Information Systems - 2021
