

Nguyen Minh Triet

Email: triet.nguyenminh@email.com

Phone: +84 (912) 555-0112

Location: Hanoi, Vietnam

GitHub: github.com/nguyenminhtriet

LinkedIn: linkedin.com/in/nguyenminhtriet

Gender: Male

Nationality: Vietnamese

Professional Summary

Highly skilled AI Engineer with over 7 years of experience in designing, developing, and deploying AI-powered systems. Proficient in machine learning, deep learning, and generative AI applications, leveraging robust MLOps pipelines and cloud platforms to optimize model performance. Strong collaborator with a proven track record of driving impactful AI solutions in fast-paced environments.

Skills

- **Programming Languages:** Python, SQL, Java, Go
- **ML/DL Frameworks:** PyTorch, TensorFlow, Scikit-learn
- **GenAI/LLM Tools:** Hugging Face, LangChain, LlamaIndex
- **Databases:** PostgreSQL, MongoDB, Redis, Elasticsearch
- **DevOps/MLOps:** Docker, Kubernetes, MLflow, Airflow
- **Cloud Platforms:** AWS, Google Cloud, Azure

Work Experience

-- [2021 - Present] **Senior AI Engineer**

| **Tech Innovations Inc., Hanoi**

- Designed and deployed AI solutions that increased processing efficiency by 30%.
- Developed and optimized large language models for customer service automation.
- Led cross-functional teams in architecting scalable AI infrastructures.
- Spearheaded the development of generative AI applications using Hugging Face.

-- [2018 - 2021] **AI Engineer**

| **Future Tech Solutions, Ho Chi Minh City**

- Created and maintained production pipelines for ML models resulting in a 20% reduction in inference latency.
- Built RAG systems for information retrieval tasks.
- Collaborated with data science teams to conduct research on emerging AI technologies.

-- [2016 - 2018] **Data Scientist**

| **Data Analytics Co., Hanoi**

- Developed and deployed statistical models to analyze data trends, leading to actionable insights.

- | - Maintained databases and optimized queries for large datasets in PostgreSQL and MongoDB.
 - | - Conducted research on deep learning methodologies to enhance data-driven solutions.
-

Projects

|-- **AI Customer Support Bot**

| **Technologies:** Python, TensorFlow, AWS

| Developed an AI-powered chatbot utilizing NLP techniques, reducing customer inquiry response time by 40%.

|-- **Generative Art Application**

| **Technologies:** PyTorch, Hugging Face, Docker

| Created an application generating art based on textual descriptions. Presented the project at an AI conference, receiving widespread acclaim.

|-- **Real-time Fraud Detection System**

| **Technologies:** Scikit-learn, PostgreSQL, Kubernetes

| Built a scalable system that identifies transaction fraud in real-time using ML algorithms, successfully decreasing fraud rates by 25%.

Education

|-- **Master of Science in Artificial Intelligence**

| **Hanoi University of Science and Technology**

| Graduated: 2016

|-- **Bachelor of Computer Science**

| **University of Danang - University of Science and Technology**

| Graduated: 2014
