PROFESSIONAL SUMMARY

Detail-oriented AI Engineer with a strong foundation in machine learning and a passion for developing AI solutions. Experienced in working as part of cross-functional teams and cultivating a collaborative environment. Eager to leverage skills in AI technologies and continue growing within the field.

SKILLS

- **Programming Languages:** Python, SQL
 - **ML/DL Frameworks:** Scikit-learn
 - **AI Tools:** Hugging Face
 - **Databases:** PostgreSQL
 - **DevOps Tools:** Docker
 - **Cloud Platforms:** AWS
-

WORK EXPERIENCE

AI Intern

Tech Innovations Co.

Hanoi, Vietnam

January 2022 - Present

- Assisted in the design and development of basic machine learning models for internal projects.
- Collaborated with senior engineers to optimize data processing pipelines.
- Conducted research on emerging AI technologies to support project initiatives.

Data Analyst Intern

Data Insights Ltd.

Hanoi, Vietnam

June 2021 - December 2021

- Supported data analysis projects to derive insights from customer data.
- Utilized SQL for data retrieval and management.
- Developed reports and dashboards that enhanced the decision-making process.

PROJECTS

Sentiment Analysis Tool

Technologies: Python, Scikit-learn

- Built a simple sentiment analysis model to classify product reviews.
- Implemented data preprocessing techniques to enhance model accuracy.

Basic Data Visualization Dashboard

Technologies: SQL, Tableau

- Created an interactive dashboard displaying trends in sales data to assist marketing strategies.

EDUCATION

Bachelor of Science in Computer Science

University of Hanoi

Graduation Date: June 2021

- Completed coursework in Data Structures, Algorithms, and Machine Learning.
