🌍 Hanoi, Vietnam

👤 Male

🇻🇳 Vietnamese

Professional Summary

Dynamic and results-oriented AI Engineer with over 5 years of experience in designing, developing, and deploying cutting-edge AI solutions. Proficient in machine learning, deep learning, and large language models, with a strong emphasis on building scalable AI infrastructure. Proven track record of optimizing model performance and collaborating with cross-functional teams to deliver impactful AI applications.

Skills

- **Programming Languages:** Python, SQL, Java, Go, JavaScript
- **ML/DL Frameworks:** PyTorch, TensorFlow, Scikit-learn
- **GenAI/LLM Tools:** Hugging Face, LangChain, LlamaIndex
- **Databases:** PostgreSQL, MongoDB, Redis, Elasticsearch
- **DevOps/MLOps:** Docker, Kubernetes, MLflow, Airflow
- **Cloud Platforms:** AWS, Azure, Google Cloud

Work Experience

-- [2020 - Present] **AI Engineer**

| Tech Innovations Co., Hanoi

| - Designed and implemented machine learning systems to predict customer behavior, achieving a 30% increase in sales conversions.

| - Developed a production pipeline for deploying AI services in a cloud environment using Docker and Kubernetes.

| - Collaborated with data scientists to build generative AI applications, enhancing user experience through personalized content.

-- [2018 - 2020] **Machine Learning Engineer**

| Data Solutions Inc., Ho Chi Minh City

| - Built and fine-tuned deep learning models for image classification tasks, achieving over 95% accuracy.

| - Developed and optimized ML pipelines utilizing MLflow for seamless deployment.

| - Researched emerging AI technologies to integrate into existing systems, driving innovation within the team.

-- [2016 - 2018] **Data Analyst**

| Analytics Group, Hanoi

- | - Conducted statistical analysis to derive insights from large datasets, assisting in strategic decision-making.
 - | - Developed data visualization tools using Python that facilitated insights into market trends.
-

Projects

- | -- **Generative AI Chatbot**
 - | - **Technologies Used:** Python, TensorFlow, Hugging Face
 - | - Developed a generative AI chatbot that improved customer support efficiency by 40% via natural language processing.
 - | -- **RAG System for Document Retrieval**
 - | - **Technologies Used:** Python, Elasticsearch, LangChain
 - | - Designed a Retrieval-Augmented Generation (RAG) system to enhance the information retrieval system, improving accuracy in response generation.
-

Education

- | -- [2011 - 2015] **Bachelor of Science in Computer Science**
 - | University of Hanoi, Vietnam
 - | - Focused on AI and machine learning coursework, graduating with honors.
- | -- [2015 - 2017] **Master of Science in Data Science**
 - | University of Ho Chi Minh City, Vietnam
 - | - Specialized in deep learning and data mining techniques, contributing to several published research papers.
