About Me

I am an experienced AI Engineer with over 5 years of expertise in designing, developing, and deploying intelligent systems that leverage machine learning and deep learning. My journey in artificial intelligence has been driven by a passion for innovation and technology, allowing me to contribute to multiple successful AI projects. I excel in creating scalable AI infrastructure, developing APIs, and implementing MLOps pipelines. My collaborative spirit helps me work effectively with cross-functional teams to advance AI technologies.

Skills

- **Programming Languages:** Python (Endorsed by 22 colleagues), SQL (Top Skilled), Java (Endorsed by 15 colleagues), Go (Endorsed by 10 colleagues)
 - **ML/DL Frameworks:** PyTorch (Top Skilled), TensorFlow (Endorsed by 20 colleagues), Scikit-learn (Endorsed by 18 colleagues)
 - **GenAI/LLM Tools:** Hugging Face (Endorsed by 12 colleagues), LangChain (Top Skilled), LlamaIndex (Endorsed by 8 colleagues)
 - **Databases:** PostgreSQL (Endorsed by 15 colleagues), MongoDB (Endorsed by 10 colleagues), Redis (Top Skilled), Elasticsearch (Endorsed by 5 colleagues)
 - **DevOps/MLOps:** Docker (Top Skilled), Kubernetes (Endorsed by 20 colleagues), MLflow (Endorsed by 12 colleagues), Airflow (Endorsed by 10 colleagues)
 - **Cloud Platforms:** AWS (Top Skilled), Azure (Endorsed by 10 colleagues), Google Cloud (Endorsed by 8 colleagues)
-

Work Experience

AI Engineer

Tech Innovators Inc.

Hanoi, Vietnam

July 2018 - Present

- Designed and developed multiple machine learning models for predictive analytics, increasing forecast accuracy by 30%.
- Built and optimized generative AI applications and LLM projects, enhancing user interaction capabilities.
- Collaborated with data engineers and product teams, leading cross-functional projects

to deliver scalable AI solutions.

- Implemented MLOps pipelines using MLflow and Airflow, reducing deployment time by 40%.

Machine Learning Engineer

Data Solutions Co.

Hanoi, Vietnam

April 2016 - June 2018

- Developed AI services and APIs, enabling integration with existing products and increasing operational efficiency.
 - Optimized model performance and reduced inference latency, improving system responsiveness for users.
 - Conducted research on emerging AI technologies and presented findings to senior management.
-

Projects

Smart Chatbot Development

Technologies Used: Python, TensorFlow, Hugging Face

- Led the development of a generative AI chatbot to assist customers, leading to a 25% increase in customer satisfaction scores.

Real-Time Analytics System

Technologies Used: Python, Scikit-learn, PostgreSQL

- Designed and implemented a real-time analytics system, empowering business users to make data-driven decisions.
-

Education

Master of Science in Computer Science

University of Hanoi

Graduated: May 2016

Bachelor of Science in Data Science

Hanoi University of Technology

Graduated: May 2014
