Gender: Female

Nationality/Origin: Vietnamese

PROFESSIONAL SUMMARY

Dynamic and detail-oriented AI Engineer with over 5 years of extensive experience in the fields of Artificial Intelligence, Machine Learning, and Data Engineering. Demonstrated expertise in designing, developing, and deploying state-of-the-art AI and machine learning models. Proficient in crafting optimized machine learning algorithms and infrastructures to support scalable AI systems. Proven ability to collaborate across multidisciplinary teams to achieve strategic goals and foster innovation. An enthusiastic learner, committed to researching and applying emerging technologies to solve complex problems effectively. Eager to drive cutting-edge projects in the field of AI and deliver impactful solutions.

SKILLS

- **Programming Languages:** Python, SQL, Java, JavaScript, Go
 - **Machine Learning / Deep Learning Frameworks:** TensorFlow, PyTorch, Scikit-learn
 - **Generative AI / LLM Tools:** Hugging Face, LangChain, LlamaIndex
 - **Databases:** PostgreSQL, MongoDB, Redis, Elasticsearch
 - **DevOps / MLOps Tools:** Docker, Kubernetes, MLflow, Apache Airflow
 - **Cloud Platforms:** Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform
 - **Data Visualization Tools:** Tableau, Power BI
-

WORK EXPERIENCE

AI ENGINEER

Tech Innovations Inc. – Hanoi, Vietnam

June 2018 – Present

- Spearheaded the development and deployment of AI-powered applications, improving operational efficiency by 35% through the incorporation of automated processes.
- Designed and implemented machine learning models that resulted in a 45% increase in predictive accuracy compared to previous systems.
- Developed AI services and RESTful APIs for seamless integration with existing software ecosystems, promoting interoperability and flexibility.
- Collaborated with cross-functional teams including software developers, data scientists,

and product managers to define project requirements and deliver robust AI solutions.

- Pioneered the optimization of model performance and inference latency, enhancing the user experience significantly.
- Implemented MLOps pipelines which streamlined model training, validation, and deployment processes.

MACHINE LEARNING ENGINEER

Data Solutions Ltd. – Ho Chi Minh City, Vietnam

April 2016 – May 2018

- Designed and developed sophisticated deep learning models that processed and analyzed large datasets, driving key insights into customer behavior.
- Successfully built and deployed production-grade AI systems, achieving rapid deployment timelines of under three months from conception to production.
- Conducted extensive research into emerging AI technologies, identifying key trends that informed corporate strategy and project direction.
- Enhanced existing codebase functionalities and performance through rigorous testing and optimization, contributing to the overall reliability of the production environment.

JUNIOR DATA SCIENTIST

Smart Analytics Inc. – Hanoi, Vietnam

January 2015 – March 2016

- Assisted in developing predictive models using regression techniques to forecast sales trends with a 60% improvement in accuracy over previous benchmarks.
- Collaborated on the execution of machine learning solutions tailored towards big data analytics, improving processing times by 30%.
- Contributed to the development of AI applications that utilized natural language processing (NLP) for automated customer support services.

PROJECTS

AI-Driven Predictive Analytics Tool

- **Technologies Used:** Python, Scikit-learn, PostgreSQL
- Developed a predictive analytics tool that utilized historical data to forecast future sales trends, enhancing decision-making processes and resulting in a 25% increase in sales.

Real-Time Sentiment Analysis System

- **Technologies Used:** TensorFlow, Hugging Face, Docker
- Designed and implemented a sentiment analysis system using LLMs for real-time processing of social media data, achieving over 90% accuracy in sentiment classification, greatly benefiting marketing strategies.

Intelligent Chatbot for Customer Support

- **Technologies Used:** Python, JavaScript, Node.js
- Created a multilingual chatbot that significantly reduced human workload in customer

service roles by automating responses and inquiries, significantly increasing customer satisfaction rates.

EDUCATION

Master of Science in Data Science

University of Science – Hanoi, Vietnam

Graduated: June 2014

Bachelor of Computer Science

National University – Hanoi, Vietnam

Graduated: June 2012

Involved in various AI-focused seminars and workshops to stay up-to-date with technological advancements and industry trends. Regularly contribute to open-source projects on GitHub showcasing innovative solutions and collaborative work efforts in Artificial Intelligence and Data Science. Actively network with fellow professionals to share insights, trends, and best practices within the AI community, ensuring continuous personal and professional development.

Dedicated to achieving excellence in AI engineering, continuously striving to leverage cutting-edge technologies and methodologies to address the evolving challenges and opportunities in the artificial intelligence landscape. Passionate about mentoring aspiring engineers and engaging in community initiatives aimed at fostering innovation and growth in the tech ecosystem.
