

Nguyen Minh Triet

- **Email:** triet.nguyenminh@email.com
- **Phone:** + 84 (912) 555-0112
- **Location:** Hanoi, Vietnam
- **GitHub:** github.com/nguyenminhtriet
- **LinkedIn:** linkedin.com/in/nguyenminhtriet
- **Gender:** Male
- **Nationality:** Vietnamese

Professional Summary

Results-oriented Artificial Intelligence Engineer with over 2 years of experience in designing, developing, and deploying machine learning applications. Proven track record in natural language processing, computer vision, and generative AI technologies. Adept at collaborating with cross-functional teams to deliver innovative AI solutions that enhance business performance and operational efficiency.

Skills

- **Programming Languages:** Python
 - **Frameworks:** TensorFlow, PyTorch, Scikit-learn
 - **Technologies:** Natural Language Processing (NLP), Computer Vision, Generative AI, Recommendation Systems
 - **Databases:** SQL, NoSQL
 - **Tools:** Git, Docker, RESTful API Development
 - **Methodologies:** Agile/Scrum, MLOps, CI/CD
 - **Other:** Model Monitoring, Ethical AI Practices, Feature Engineering
-

Work Experience

- | -- [2021 - Present] **AI Engineer**
 - | FPT Corporation, Hanoi, Vietnam
 - | - Designed and deployed scalable AI solutions, increasing operational efficiency by 30%.
 - | - Developed machine learning models for NLP tasks, improving customer service automation.
 - | - Integrated AI models into existing software systems using RESTful APIs and microservices.
 - | - Collaborated with product managers to translate business requirements into technical specifications.
 - | - Implemented continuous model monitoring and optimization strategies to ensure peak performance.
- | -- [2020 - 2021] **Data Scientist**
 - | TechSoft Solutions, Hanoi, Vietnam
 - | - Developed deep learning models for image recognition, enhancing product search accuracy by 25%.
 - | - Created data preprocessing pipelines and feature engineering workflows to improve model

accuracy.

- | - Evaluated and adopted new AI methodologies, incorporating state-of-the-art techniques into projects.
 - | - Drafted documentation for model performance and system architecture, facilitating team knowledge sharing.
-

Projects

|-- AI-Powered Customer Support Chatbot

- | - **Technologies Used:** Python, TensorFlow, NLP
- | - Developed a chatbot that improved response times by 50%, leading to higher customer satisfaction.
- | - Implemented machine learning algorithms to refine bot responses based on user interactions.

| -- Image Classification System

- | - **Technologies Used:** Python, PyTorch, Computer Vision
- | - Designed an image classification model that achieved 90% accuracy on a validation dataset.
- | - Utilized convolutional neural networks (CNNs) to enhance detection capabilities across various categories.

| -- Personalized Recommendation Engine

- | - **Technologies Used:** Python, Scikit-learn, SQL
 - | - Built a recommendation system that increased user engagement by analyzing consumption patterns effectively.
 - | - Employed collaborative filtering and content-based techniques to provide tailored suggestions.
-

Education

|-- Bachelor of Science in Computer Science

- | University of Hanoi, Hanoi, Vietnam
 - | - Graduated: June 2020
 - | - Relevant Coursework: Artificial Intelligence, Data Mining, Machine Learning, Software Engineering
-

Certifications

- **Certified TensorFlow Developer**
 - **Professional Certificate in Artificial Intelligence** - edX
-

Languages

- Vietnamese (Native)
- English (Fluent)
