Professional Summary

Passionate Artificial Intelligence Engineer with a strong foundation in machine learning, natural language processing, and deep learning technologies. Adept at delivering innovative AI solutions and collaborating with cross-functional teams to solve complex business problems. Eager to contribute to projects that enhance efficiency and drive digital transformation.

Technical Skills

Programming Languages: Python, SQL	Frameworks: TensorFlow, PyTorch, Scikit-learn
Technologies: Natural Language Processing, Computer Vision, Generative AI	Tools: Git, Docker, RESTful API development
Databases: SQL, NoSQL	Development Practices: Agile/Scrum, CI/CD

Work Experience

Data Scientist Intern	XYZ Corporation, Hanoi, Vietnam
<i>June 2022 - Present</i>	- Assisted in the design and implementation of machine learning models for data classification projects. - Developed data preprocessing pipelines and conducted feature engineering. - Collaborated with teams to translate business requirements into technical tasks. - Participated in model evaluation and optimization efforts.

| **AI Research Assistant** | University of Technology, Hanoi, Vietnam | | *September 2021 - May 2022* | - Conducted research in deep learning methodologies for computer vision applications. | | | - Worked on natural language processing projects, focusing on sentiment analysis. | | | - Assisted in the documentation of research findings and presentations. |

Practical Projects

Chatbot Development	GPT-based chatbot utilizing NLP techniques for customer service automation.
Real-time Object Detection	Developed a computer vision application using TensorFlow for real-time object recognition.
Recommendation System	Created a movie recommendation system leveraging collaborative filtering and machine learning algorithms.

Education

Bachelor of Science in Computer Science	Hanoi University of Science and Technology
--	--

Graduated: June 2021

Focused on Artificial Intelligence and Data Analysis.
