Nationality: Vietnamese

Professional Summary

I am a passionate Artificial Intelligence Engineer with over 2 years of experience in designing and deploying intelligent systems that solve real-world challenges. My strengths lie in machine learning, natural language processing, and computer vision. I enjoy collaborating with multidisciplinary teams to research and implement cutting-edge AI technologies. I thrive in dynamic environments and continuously seek to improve AI model performance to align with business objectives.

Skills

- **Programming Languages:** Python (Top Skilled), SQL (Endorsed by 8 colleagues), NoSQL
 - **Frameworks:** TensorFlow (Endorsed by 10 colleagues), PyTorch, Scikit-learn
 - **Technologies:** Natural Language Processing, Computer Vision, Generative AI
 - **APIs:** RESTful API Development
 - **Tools:** Git, Docker, MLOps tools
 - **Cloud Platforms:** AWS, Google Cloud Platform (Familiar)
 - **Development Methodologies:** Agile/Scrum, CI/CD Pipelines
-

Work Experience

Artificial Intelligence Engineer

FPT Software | Hanoi, Vietnam

June 2021 - Present

- Designed and implemented machine learning models for diverse applications, contributing to significant operational efficiencies.
- Collaborated with cross-functional teams to translate business requirements into AI solutions and deployment strategies.
- Developed data preprocessing pipelines and feature engineering workflows to optimize model performance.
- Integrated AI models into existing software systems via RESTful APIs.

Data Scientist Intern

Tech Solutions Co. | Hanoi, Vietnam

January 2020 - May 2021

- Assisted in developing machine learning algorithms for predictive analytics, resulting in a 15% accuracy improvement over previous models.
 - Participated in the construction of evaluation frameworks to analyze model efficacy and performance metrics.
 - Contributed to team discussions on emerging AI technologies and their potential business applications.
-

Projects

NLP Chatbot Application

Technologies Used: Python, TensorFlow, NLP

- Developed an intelligent chatbot for customer support that reduced response times by 40% through natural language processing capabilities.

Image Classification System

Technologies Used: PyTorch, Computer Vision

- Created an application that classifies images with over 85% accuracy using convolutional neural networks.
-

Education

Bachelor of Science in Computer Science

Hanoi University of Science and Technology | Hanoi, Vietnam

Graduated: June 2021
