Professional Summary

Junior Developer with no commercial experience but a Lead Developer with 8 years of experience in artificial intelligence and machine learning. Proven ability to deliver robust AI solutions while collaborating with multidisciplinary teams to address complex business challenges.

Skills

- Programming Languages: Python
 - Machine Learning/Deep Learning Frameworks: TensorFlow, PyTorch, Scikit-learn
 - AI Domains: Natural Language Processing (NLP), Computer Vision, Generative AI
 - Databases: SQL, NoSQL
 - Development Tools: Git, Docker, RESTful APIs
 - Deployment: Microservices, AWS
 - Methodologies: Agile/Scrum
-

Work Experience

AI Solutions Company

Lead Developer

January 2015 - Present

- Designed, developed, and maintained scalable machine learning models for diverse applications, which improved operational efficiency by 30%.
- Collaborated with data scientists and software engineers to transform business requirements into AI-driven solutions.
- Integrated AI algorithms into existing systems through RESTful APIs and deployed them in production environments.

Tech Innovators Ltd.

Junior Developer

June 2014 - December 2014

- Contributed to the development of machine learning applications without any prior commercial experience, achieving project completion ahead of schedule.
 - Developed data preprocessing pipelines and participated in model evaluation, leading to a successful transition of AI models into production systems.
-

Projects

NLP Chatbot

Technologies Used: Python, TensorFlow, Scikit-learn

- Developed a natural language processing-powered chatbot that enhanced customer service efficiency by 40%.

Image Classification System

Technologies Used: PyTorch, OpenCV

- Created an image classification system that achieved over 85% accuracy, enabling faster decision-making processes in logistics.
-

Education

Bachelor of Science in Computer Science

. University of Technology

Graduated: 2013
