PROFESSIONAL SUMMARY

Passionate Artificial Intelligence Engineer with over **two years** of extensive experience in developing, designing, and deploying robust AI solutions that effectively address real-world business challenges. A dedicated and detail-oriented professional, I excel at collaborating with multidisciplinary teams to build intelligent systems utilizing cutting-edge technologies. I have a strong commitment to advancing my understanding of machine learning, deep learning, natural language processing, and computer vision methodologies. My career ambition is to contribute significantly to the successful implementation of AI solutions that enhance operational efficiency and align with strategic business objectives.

SKILLS

- **Programming Languages:** Python, Java, C++
 - **Frameworks:** TensorFlow, PyTorch, Scikit-learn, Keras, Flask
 - **Technologies:** Natural Language Processing (NLP), Computer Vision, Generative AI, Machine Learning, Deep Learning
 - **Databases:** SQL (MySQL, PostgreSQL), NoSQL (MongoDB, Cassandra)
 - **Other Tools:** Git, Docker, RESTful API development, Kubernetes, Jenkins
 - **Cloud Platforms:** AWS, Azure, Google Cloud Platform
 - **Methodologies:** Agile, Scrum, MLOps, CI/CD pipelines
 - **AI Techniques:** Supervised Learning, Unsupervised Learning, Reinforcement Learning, Recommendation Systems, Retrieval-Augmented Generation (RAG)
-

WORK EXPERIENCE

Artificial Intelligence Engineer

ABC Tech Solutions | Hanoi, Vietnam
March 2021 - Present

- Initiated the design, development, and deployment of various machine learning models that significantly improved operational efficiency, directly aligning with overarching

business objectives.

- Collaborated with cross-functional teams comprising software developers, product managers, and business analysts to translate business challenges into innovative AI-driven solutions.
- Constructed and optimized data preprocessing pipelines and feature engineering workflows tailored for specific projects, ensuring reliable model training and validation processes.
- Engaged in integrating complex AI models into existing software systems through RESTful APIs and microservices, facilitating seamless deployment and access.
- Conducted extensive research on new AI frameworks including Large Language Models (LLMs) such as GPT while keeping abreast of state-of-the-art techniques in the field.
- Documented architectural decisions and maintained comprehensive records of model performance and deployment procedures to ensure clarity and knowledge transfer within the team.
- Played a pivotal role in performing ongoing monitoring and continuous improvement of AI models in a dynamic production environment.

Junior Data Scientist

XYZ Innovations | Ho Chi Minh City, Vietnam

June 2019 - February 2021

- Assisted in the development and maintenance of machine learning algorithms designed to solve specific business problems, leading to measurable improvements in service delivery.
 - Participated in numerous projects focused on natural language processing and computer vision, where I utilized tools and technologies such as Scikit-learn and TensorFlow.
 - Contributed to team discussions and brainstorming sessions to identify innovative use cases for machine learning applications within the company's strategic framework.
 - Developed and maintained documentation detailing project milestones and outcomes to communicate continuously with stakeholders regarding progress and findings.
-

PROJECTS

Intelligent Document Processing System

Technologies Used: Python, TensorFlow, NLP, MongoDB

- Developed a comprehensive solution that automates the extraction of data from various document formats, enhancing data entry efficiency by over **50%**.

Automated Chatbot for Customer Service

Technologies Used: Python, Scikit-learn, Flask, SQL

- Designed and implemented a customer service chatbot that intelligently responds to inquiries, elevating customer satisfaction ratings considerably.

Real-time Image Classification Application

Technologies Used: PyTorch, OpenCV, RESTful APIs

- Created an application that classifies images in real-time, showing significant potential for integration into retail and e-commerce platforms, to enhance user experience.
-

EDUCATION

Bachelor of Computer Science

University of Technology | Hanoi, Vietnam

Graduated: May 2019

- Specialized in Artificial Intelligence, focusing on machine learning and data science initiatives, accumulating practical experience through various coursework and projects.
 - Actively involved in programming competitions and hackathons, achieving placements in multiple challenges showcasing coding and problem-solving abilities.
-

ADDITIONAL INFORMATION

- Continuous learner with a zeal for expanding knowledge in the latest advancements in AI and machine learning technologies.
 - Participated in various conferences and seminars, committed to staying current with industry trends and insights that could influence future AI projects.
 - Well-versed in collaborating within agile environments, contributing to team success through open communication and adaptive strategies.
-
