

NGUYỄN PHÁT HƯNG

Fresher Software Engineer | Fresher Software Tester

SUMMARY

Fresh Software Engineering graduate with 350+ internship hours and experience resolving 18 feature, business logic, and bugfix tickets. Built five fullstack applications with project scores reaching 8.0/10 while applying manual, regression, API, and automated testing. Targeting entry level roles in software development or quality assurance to deliver reliable, high quality products.

EXPERIENCE

Internship | LOGTECHUB (Logistics Tech Hub Co. LTD)

07/2025 – 09/2025

- Developed the company's project features using Angular (v16) and built an Outlook add-in.
- Resolved 18 tickets, including new feature development, business logic adjustments, and bug fixes.
- Completed over 350 hours of software development internship experience.

SKILLS

- **Programming Languages:** Proficient in C#, Java, and TypeScript, with basic knowledge of Python.
- **Databases:** Proficient in Microsoft SQL Server, Firestore, MongoDB (NoSQL), with basic knowledge of SQLite and Oracle 19C.
- **Frameworks:** ASP.NET MVC, Java Swing, ReactJS, React/TypeScript, Angular (v16), Bootstrap, Tailwind CSS, Android SDK.
- **Operating System:** Windows.
- **Web Development:** Hands-on experience in system analysis and design, as well as developing web applications with ASP.NET MVC, ReactJS, and Next.js using the App Router. Familiar with server-side rendering (SSR), static site generation (SSG), single-page applications (SPA), client-side rendering, lazy loading, caching, Tailwind CSS, secure REST API development, and fundamental web security practices.
- **Mobile Development:** Hands-on experience developing Android applications in Java using the Android SDK.
- **Software Testing:** Hands-on experience in manual and automated testing, including test case design, functional testing, workflow validation, defect reporting, regression testing, API testing using Postman, and test automation using Selenium WebDriver.
- **Other Skills:** Git, Firebase, Microsoft Office, Selenium WebDriver, Postman.

EDUCATION

Master of Information Technology

07/2025 – Present

Ho Chi Minh City University of Foreign Languages and Information Technology

Current GPA: 8.58/10.00 - **Current credit:** 44/60

Bachelor of Information Technology – Major: Software Engineering

09/2021 – 03/2025

Ho Chi Minh City University of Foreign Languages and Information Technology

GPA: 3.40/4.00

CERTIFICATIONS

Microsoft Office Specialist – Associate (Microsoft 365 Apps)

07/2026

Word Associate, Excel Associate, PowerPoint Associate

IELTS Academic

06/2026

Band Score: 6.5 – B2 (Listening: 6.5 | Reading: 7.0 | Writing: 6.5 | Speaking: 5.0)

TOEIC

12/2024

Score: 835 (Listening: 460 | Reading: 375)

Python Data Associate

10/2024

Associate Data Analyst

09/2024

PROJECTS

Website for managing preschool education

04/2024 – 09/2024

- Built full-stack features for course management, grade management, content management, lesson assignments, tracking student progress, displaying lessons, messaging. Developed authenticated APIs for management in the graduation thesis, achieving a score of 7.5/10.0.
- Using TypeScript, NextJS, Tailwind CSS, Firebase, Firestore, Git, Vercel, Postman.

Automated Testing for Tech Store Electronics Website

12/2023 – 03/2024

- Developed an automated testing system using randomly selected data from the available dataset to test product search, adding/removing items from the cart, checkout, and order cancellation for the final exam project, achieving a score of 8.5/10.0.
- Using Selenium WebDriver, .NET

Car Rental Management Website

09/2023 – 11/2023

- Implemented full-stack features for vehicle management, rental list management, staff management, and built APIs for fetching vehicle information and booking in the final exam project, achieving a score of 8.5/10.0.
- Using JavaScript, React Vite, NodeJS, Bootstrap, Tailwind, Express, Git, Vercel, Railway.

Shopping Mall Management Website

05/2023 – 03/2024

- Developed full-stack features for user management, facility management, staff management and event/promotion management for the final exam project, achieving a score of 8.0/10.0.
- Using ASP.NET MVC, SQL Server, Bootstrap, Git.

Chicken shooting game

05/2023 – 08/2023

- Programmed game mechanics, user interfaces, and graphics for the final exam project, achieving a score of 8.0/10.0.
- Using Java, Java Swing.

Music player app

02/2023 – 05/2023

- Developed full-stack music playback, search, and management features for music and albums on the device for the final exam, achieving a score of 8.0/10.0.
- Using Java, Android SDK, Firebase.

-
- Developed full-stack features for shopping, product management, category management and order management for the final exam project, achieving a score of 8.0/10.0.
 - Using C#, ASP.NET MVC, Bootstrap, SQL Server.
