

Nguyễn Văn Nam K

Back-end .NET Developer

📅 21/07/2003 📞 0373.763.847 ✉ namkhanh307.work@gmail.com 📍 Sunview Town, Thu Duc City

CAREER OBJECTIVE

Short-term: Earn knowledge, and experience in web development, cross-platform application and software development methodology. Long-term: Become a Full-Stack Developer.

EDUCATION

FPT University Bachelor Software Engineering	09/2021 - 09/2025
---	-------------------

WORK EXPERIENCE

PROJECTS

Viet Y Clinic Management System FullStack Developer, DevOps	03/2025 - 07/2025
---	-------------------

A web platform and mobile app for a Vietnamese traditional clinic system, patient record management, streamlined workflows examination for doctors and system management for administrators. Website: <https://vietyhealthcare.com>. Tech Stack: .NET Core API, SQL Server, React, Docker, CI/CD. Contributions: Developed doctor portal handling 50+ patient examination forms per day with real-time status updates. Built an admin dashboard used by 2 clinic branches to manage staff, configure questionnaires, and control system settings. Implemented features for 100+ configurable metrics standards and healthcare guideline templates. Designed CI/CD pipelines that reduced deployment time from ~30 minutes to under 5 minutes for both web and mobile apps. Configured and managed 2 VPS servers with WireGuards VPN, ensuring 100% encrypted communication between client and server. Roles: FullStack Developer, DevOps

Garment Factory Management System Back-end Developer	05/2024 - 09/2024
--	-------------------

Comprehensive factory platform for tracking production orders, inventory flow, and employee activities with real-time dashboards. Tech Stack: .NET Core API, SQL Server. Contributions: Developed product and order management system tracking 1,000+ products and daily production orders. Integrated quality assurance workflows, reducing defective outputs by an estimated 15% before shipment. Designed real-time dashboards monitoring 20+ KPIs for 50+ employees, improving task visibility and accountability. Built a 2D warehouse map for managing 500+ inventory items, reducing retrieval time for goods by ~25%. Roles: Back-end Developer

SKILLS

Languages & Frameworks	C#, .NET Core, ASP.NET, Entity Framework
JavaScript (ES6+), React	
Front-end	React, HTML, CSS3, Material-UI, Bootstrap, TailwindCSS
Back-end	RESTful API Development, SQL Server
DevOps	Docker, CI/CD, VPS Management, WireGuard, Linux Server Administration (Ubuntu)
Tools	Git (GitHub), Visual Studio, VS Code, Postman, Swagger
Other	OOP, SOLID, ACID, Agile/Scrum, Unit Testing, JWT Authentication
