

Nguyễn Văn C

Fullstack Developer

📞 [protected] ✉ [protected] 📍 [protected]

CAREER OBJECTIVE

Fullstack Developer with 3 years of experience, focusing on building high-performance and scalable systems. Seeking opportunities to contribute to the design and development of large-scale architectures, while advancing expertise in backend technologies, cloud infrastructure, and distributed systems.

EDUCATION

Thuy Loi University	Aug 2021 - Oct 2025
Bachelor	
Information Technology	

WORK EXPERIENCE

BACHVIET HIGH TECH JOINT STOCK COMPANY	Mar 2024 - Present
Software Engineer	

- Digital Training System:** Analyzed business requirements and contributed to the design of a scalable digital training system architecture. Managed and maintained application servers with aaPanel, including deployment and monitoring of multiple projects. Built RESTful APIs in .NET Core for mobile apps, enabling parents to track student progress; collaborated with frontend and mobile teams for smooth integration. Implemented continuous integration and deployment (CI/CD) pipelines using GitHub Actions, automating build, test, and deployment workflows. Deployed projects to production environments, optimized server configurations, and ensured system stability under high load.
- Library Digital Project:** Participated in analyzing requirements and designing the architecture of the digital library system. Developed the user-facing book reader interface, enabling seamless reading and navigation of digitized books. Implemented APIs in .NET Core to deliver book content, handle user sessions, and manage reading history. Built responsive React.js components for smooth page rendering, search, and bookmarking features.

BACHVIET HIGH TECH JOINT STOCK COMPANY	Apr 2023 - Feb 2024
Software Engineer	

- cShop (Microservice Learning Project):** Built a microservices-based e-commerce backend featuring MediateR for CQRS, FluentValidation for request validation, Kafka for inter-service communication, Debezium CDC with Outbox Pattern, schema versioning via Schema Registry, and Redis caching for enhanced performance.
- eLearning (Credit Registration System):** Built a microservices-based course registration system using .NET Core, React, and Kafka, with hybrid databases (PostgreSQL, MongoDB, Redis) and CI/CD pipelines on GitHub Actions. Enabled conflict-free scheduling and supported thousands of concurrent student registrations.

PROJECTS

cShop
Full-stack Developer

Microservice Learning Project. Built a microservices-based e-commerce backend featuring MediateR for CQRS, FluentValidation for request validation, Kafka for inter-service communication, Debezium CDC with Outbox Pattern, schema versioning via Schema Registry, and Redis caching for enhanced performance

eLearning (Credit Registration System)
Full-stack Developer

Built a microservices-based course registration system using .NET Core, React, and Kafka, with hybrid databases (PostgreSQL, MongoDB, Redis) and CI/CD pipelines on GitHub Actions. Enabled conflict-free scheduling and supported thousands of concurrent student registrations

SKILLS

Languages	C#, JavaScript (ES6+), TypeScript, SQL
Frontend	React.js, Next.js, HTML5, CSS3, TailwindCSS
Backend	.NET Core, ASP.NET, RESTful APIs, gRPC, Microservices
Databases	SQL Server, PostgreSQL, MongoDB, Redis
DevOps	Docker, CI/CD (GitHub Actions)
Other	Git, Linux

ADDITIONAL INFORMATION

3 years of professional experience in fullstack development with expertise in microservices architecture and cloud technologies.
