WORK EXPERIENCE

PROJECTS

Watch Store Management Website 8/2024 - 12/2024
Team Leader & Full-Stack Developer
Developed a website for managing a watch store (reference: WatchStore.vn) with full real-world functionalities.
Technologies: ASP.NET MVC, C#, Entity Framework, SQL Server, HTML5/CSS3, Bootstrap, JavaScript, jQuery, AJAX.
Features: Product catalog with pagination, sorting, and filtering (by brand, price, type). Product detail with zoomed images and descriptions. Order history and order tracking. Admin features including CRUD for products, inventory, categories, and brands. Order management and status updates. User management with admin/user roles. Revenue reports and real-time statistics with charts. Source code: Web-WatchStore.git

Dictionary & AI Chatbox Website 2/2025 - 5/2025
Back-End Developer
Built an intelligent dictionary website with AI chatbot integration. Features: Word lookup (meaning, pronunciation, examples, part of speech). Quick sentence and word translation. Personalized learning & practice: Support creating vocabulary lists, smart flashcards. Learn vocabulary by topic with pictures and illustrative examples. Provide diverse Toeic tests by level. AI support: AI Chatbot explains grammar, suggests learning paths. Suggests learning paths based on user progress. Technologies: ASP.NET Core, C#, RESTful API, SQL Server, JavaScript, AJAX. Source code: Dictionary-ChatboxAI
