CAREER OBJECTIVE

Aspiring to specialize in Backend Development with a focus on C#/.NET, leveraging strong fundamentals in OOP, SQL, and REST API in a professional setting. Aiming to become proficient in ASP.NET Core & Entity Framework within 1-2 years, with the ability to deliver independent, high-quality solutions.

EDUCATION

Ho Chi Minh City University of Foreign Languages and Information Technology	09/2017 - 09/2021
Bachelor	
Information Technology	

WORK EXPERIENCE

DXC TECHNOLOGY SERVICE VIET NAM CO. LTD	03/2023 - 06/2024
Back End Developer (Node.js)	
- Analyzed project requirements and designed technical solutions - Developed and deployed RESTful APIs using Node.js - Implemented comprehensive unit testing to ensure API reliability - Troubleshoot and optimized API performance - Conducted regular code reviews to maintain quality - Collaborated with team members to solve problems and design solutions	

PROJECTS

Sales Management System (Backend API)	05/2025 - 07/2025
Backend Developer	
A backend API system developed to manage sales operations, including orders, customers, and products. Designed with layered architecture and RESTful principles. Data is persisted in SQL Server. The entire system is containerized using Docker for easy deployment and environment setup. Key Responsibilities: Designed and implemented the Order module with full CRUD operations using Entity Framework Core. Developed Data Transfer Objects (DTOs) and applied AutoMapper for clean object mapping. Built and documented RESTful APIs using Swagger and tested endpoints via Postman. Containerized the API and SQL Server with Docker and configured docker-compose for seamless development environment setup. Followed best practices in structuring solution layers: Entity, DTO, Service, and Controller	

ACTIVITIES

CERTIFICATES

C# (Basic) Certificate - HackerRank	07/2025
SQL (Intermediate) Certificate - HackerRank	04/2024
SQL (Basic) Certificate - HackerRank	03/2024

SKILLS

Programming	C# (2 years), JavaScript (1 year), CSS 3 (< 1 year), HTML5 (< 1 year), Python (< 1 year)
--------------------	--

Languages

Framework/Platform	.NET (1 year), .NET Core (1 year), ASP.NET (1 year), Node.JS (1 year), WinForms (< 1 year)
Version Control	Git (1 year), Github (1 year)
Database	SQL server (2 years), Entity Framework (1 year), LINQ (1 year), Entity Framework Core (< 1 year)
Other	Agile (1 year), OOP (1 year), Scrum (1 year), SOLID Principles (< 1 year), Unit testing (< 1 year)
