OSP | Fullstack Developer

Project OSP Affiliate

Development function manage user

Develop function manage cart SIM

Development function report

Participate in the development of Frontend Angularjs

Participate in the development of Backend systems, APIs for products on Java language

Coordinate work with BA (Business Analysis), Tester during project implementation;

Project CRM

Sync table million data from Oracle db Mobifone to Db MySQL OSP serve for control

Project CMS

Develop function manage user

Development function report

Participate in the development of Frontend Angularjs

Participate in the development of Backend systems

Project Spack

Develop function split credit score for customer mobifone

Sync data from mobifone

Send and receive from mobifone

Participate in the development of Backend systems.

Monitor, deploy server.

Programming language : Spring boot ,Spring MVC, Java, Hirbernate ,AngularJS

Tools: IntelliJ , Postman ,Soap,Docker

Platform ,server and database: Oracle11g , Mysql , Kafka, Centos 8

SVN,GIT

Design Pattern, Solid

Clean code

○

3/2021 - 3/2022

Lien Viet Post Bank | Backend Developer

Project Uniform

Consolidate service registration interface for customers from different applications into a common registration interface

(Core banking, Card, Internet Banking, SMS Banking, ...)

Participate in the development of Backend systems

Create ,update Cif.

Create ,update Account.

Intergrate SMSBanking.

Coordinate work with BA (Business Analysis), Tester during project implementation;

Programming language : Java, Hirbernate ,AngularJS, Spring cloud

Tools: IntelliJ , Postman ,Soap ,Gitlab

Platform ,server and database: Oracle11g , Mysql , Kafka, Centos 8 ,Docker

5/2019 - 3/2021

VNPT TECHNOLOGY | Fullstack Developer

Project GPON NMS

Develop function manage device information ONT.(Uptime,Wan,Lan...)

Develop device manage configuration.

Contact client ,support implement version GNMS system on server

Deploy server.

Project One Plaform

Develop function manage device information OLT,ONT,SETTOPBOX.

Develop device manage configuration.

Development of Frontend Angularjs

Development of Backend systems

Programming language : Spring boot , Java, Hirbernate ,AngularJS , Strust ,ExtendJs

Tools: IntelliJ , Postman ,Soap ,GitHub

Platform ,server and database: Oracle11g , Mysql , Kafka, RabbitMQ, Kafka, Centos 8

8/2017 - 11/2017

FRESHER TRAINING CMC RDC | Full-time

- Trainning SQL,Java core , Spring MVC

- Have experienced built web ATM as Spring MVC

6/2017 - 5/2019

CMC SOFT | .Net Developer

Project Edocman

Development electronic document management for the financial.

Development management document incoming, outgoing documents, reports

Programming language : .NET

Tools: Visual

Platform ,server and database: Oracle , SVN
