## ABOUT ME

Java Backend Developer with nearly 3 years of experience developing enterprise applications using Java, Spring Boot, Microservices, PostgreSQL, Camunda, AWS, and AI agents. Experienced in banking, workflow automation, and modern web application development, with expertise in RESTful API design, backend integration, and cross-functional collaboration with international teams. Passionate about building scalable backend systems and continuously enhancing technical skills.

## EDUCATION

### BACHELOR OF COMPUTER SCIENCE

VSB-TUO: TECHNICAL  
UNIVERSITY OF OSTRAVA  
(CZECH)  
2019 - 2023

- Focused on software engineering, algorithms, databases, and object-oriented programming.

## PROJECTS

### MARKET PLACE - AXON ACTIVE

01/2026 - Present

- **Number of participants:** 8+
- **Project description:** Contributed to the development and maintenance of the Axon Ivy Marketplace, a platform that delivers reusable workflow applications, process automation components, and third-party connectors for enterprise BPMN solutions and Axon Ivy Designer.
- **Technical stack:** Java Spring Boot, JSF, RESTful APIs, Angular, CI/CD, AI agents, BPMN, PostgreSQL and backend integration technologies.
- **Responsibilities:**
  - Developed and maintained marketplace modules using Java Spring Boot, Angular, and JSF.
  - Maintained and enhanced over 80 third-party connectors, ensuring compatibility and stability across multiple product versions.
  - Implemented new features and resolved production issues across multiple product versions.
  - Supported CI/CD pipelines by developing Jenkins pipelines to automate SonarQube code analysis, improving code quality and identifying security vulnerabilities.
  - Designed, developed, and integrated AI agents to automate the generation of technical documentation for products and third-party connectors.
  - Developed and maintained full-stack banking solutions using Axon Ivy Designer, customizing the company's products to meet the requirements of Austria Wirtschaftsservice Gesellschaft.
- **Product:** <https://market.axonivy.com/teams>
- **Customers:** German, Switzerland and Austria Wirtschaftsservice Gesellschaft.

## WORK EXPERIENCES

### SOFTWARE ENGINEER

AXON ACTIVE  
January 2026 - Present

Responsibilities:  
Worked in an Agile environment as a Software Developer, designing, developing, and maintaining application features.

BACKEND DEVELOPER

UNIT CORPORATION  
10/2024 - January 2026

Responsibilities:  
Contributed to the team as a Backend Developer, specifically analyzing customers' requirements and documentation to design APIs and handle tasks.

BACKEND DEVELOPER

AGEST VIET NAM  
01/2024 - 10/2024

Responsibilities:  
Worked in an Agile environment as a Backend Developer, analyzing requirements and implementing product features. Collaborated with stakeholders during the development and delivery phases.

SKILLS

- Programming: Java and Python.
- Frameworks: Spring Boot, Angular and FastAPI.
- Database: PostgreSQL, MySQL and Oracle.
- Tools: Git, Jira, Redmine and Kibana.
- Technical stacks: Kafka , Redis Cache, Camunda and Axon Ivy Designer.
- Cloud & DevOps: CI/CD, GitHub Actions, Jenkins, Docker and AWS.
- Testing: JUnit, Mockito, MockMVC.
- AI: AI Agents, Prompt Engineering.

CERTIFICATES

IELTS 5.5 2018  
Professional working proficiency

UNO BANK - UNIT

09/2025 - 01/2026

- **Number of participants:** 10+
- **Project description:** Cloud-native digital banking platform built on a microservices architecture, supporting payments, loans, and third-party financial integrations.
- **Technical stack:** Java Spring Boot, PostgreSQL, AWS Microservices, Camunda.
- **Responsibilities:**
  - Developed Spring Boot microservices and RESTful APIs on AWS.
  - Collaborated with India and Vietnam teams. Designed and implemented API integrations.
  - Participated in requirement analysis and API design.
- **Customers:** India and the Philippines

ECONTRACT - UNIT

07/2025 - 09/2025

- **Number of participants:** 12+
- **Project description:** Enterprise contract management platform supporting digital signatures, BPMN-based workflow automation, SharePoint integration, and contract lifecycle management.
- **Technical stack:** Java Spring Boot, PostgreSQL, Microservices, Camunda.
- **Responsibilities:**
  - Collaborated with Business Analysts to analyze requirements, design business workflows, and translate them into technical solutions.
  - Designed database schemas and developed RESTful APIs.

EPORTAL - UNIT

10/2024 - 07/2025

- **Number of participants:** 12+
- **Project description:** Developing ePortal website with partner Sacombank, supporting them to optimize a process working and paperless for user.
- **Technical stack:** Java Spring Boot, Oracle, Microservices, Camunda.
- **Responsibilities:**
  - Designed RESTful APIs and Oracle database schemas.
  - Collaborated with Sacombank for integration and deployment.
  - Developed and maintained BPMN workflows using Camunda to automate business processes.
- **Customer:** Sacombank

SUBSCRIPTION PLAN - AGEST

01/2024 - 10/2024

- **Number of participants:** 10+
- **Project description:** Subscription management platform allowing users to select subscription plans with configurable pricing based on fee type, duration, thresholds, and usage.
- **Technical stack:** Python, FastAPI, Next.js, Docker, PostgreSQL.
- **Responsibilities:**
  - Developed RESTful APIs with FastAPI.
  - Designed PostgreSQL database.
  - Collaborated with frontend team and deployed new features.
