TrueAuto (Cloud-based Supply Chain Management)

04/2022 - 07/2025

Software Engineering

- Worked on TrueAuto - a cloud-based supply chain management solution that digitally connects you to your customers, suppliers, buyer, and 3PLs on a single platform, providing real-time automation, exception alerts, and instant access to business critical transactions
- Project Team Size: 14
- Use .NET framework technologies to develop web applications for client server environments and add functionalities to existing applications. Develop project concepts and maintain optimal workflow
- Develop and maintain customized data-centric web applications and services using ASP.NET, C#.NET, LINQ, SQL Server
- Experiences of developing integration by using custom REST APIs built in .NET (Microservices)
- Fixed bugs from existing websites and implemented enhancements that significantly improved web functionality and speed
- Consult with customers on project status and technical concerns
- Continuously improve the existing system with new technologies
- Using third party such as: OneSignal, Docker, FusionAuth, etc...

CarpTech

12/2021 - 03/2022

Software Engineer
