

Bui Khanh Linh

UI Engineer | React JS, TS, Web API, Mobile-first Interfaces

Ho Chi Minh City | khanh.linh.cv08@example.com | gitlab.com/linh-ui

PROFESSIONAL SUMMARY

UI engineer using alternative terms instead of exact JD keywords: React JS, TS, web endpoints, server data connection, utility-first styling, mobile-first layout, source control, and visual charts.

TECHNICAL KEYWORDS / ALIASES

- React JS and TS for component-based single-page apps
- Web API consumption with axios, bearer-token sessions, request/response validation
- MS-style dashboard tables and visual charts for business metrics
- Utility-first CSS and ready-made CSS framework usage for fast UI delivery
- Source control with GitLab merge requests and branch reviews

EXPERIENCE

UI Engineer - Orbit Finance Tools, 2023 - 2026

- Created mobile-first business screens that adapt from laptop to tablet and phone resolutions.
- Connected client pages to web endpoints for transactions, users, and reporting screens.
- Built chart widgets for profit trend, monthly revenue, and customer activity using a charting package.
- Worked with backend engineers to agree on payload names and error-code handling.

PROJECTS

- Business Metrics Console - React JS, TS, REST endpoints, chart widgets, utility-first styling.
- Account Settings UI - Form validation, API-driven save flow, responsive layout.

EDUCATION

B.S. in Software Engineering - 2022
