LinkedIn: linkedin.com/in/ngominhanh

Gender: Female

Nationality: Vietnamese

Professional Summary

Results-driven AI Engineer with over 5 years of experience in designing, developing, and deploying innovative AI solutions. Proficient in machine learning and deep learning, with a strong focus on building scalable AI infrastructure and optimizing model performance. Adept at collaborating with cross-functional teams to deliver high-quality AI products.

Skills

- **Programming Languages:** Python, SQL, Java, Go
- **ML/DL Frameworks:** PyTorch, TensorFlow, Scikit-learn
- **GenAI/LLM Tools:** Hugging Face, LangChain, LlamaIndex
- **Databases:** PostgreSQL, MongoDB, Redis, Elasticsearch
- **DevOps/MLOps:** Docker, Kubernetes, MLflow, Airflow
- **Cloud Platforms:** AWS, Azure, Google Cloud

Work Experience

-- [2021 - Present] AI Engineer

| Company ABC, Hanoi, Vietnam

| - Designed and implemented machine learning models to enhance product features, resulting in a 30% increase in user engagement.

| - Collaborated with data scientists to develop AI services and APIs for web applications.

| - Optimized model performance and reduced inference latency by 20% through rigorous testing and enhancements.

-- [2018 - 2021] Data Scientist

| Company XYZ, Hanoi, Vietnam

| - Developed and deployed scalable AI solutions, improving data processing time by 40%.

| - Built and maintained MLOps pipelines using Docker and Kubernetes, streamlining model deployment.

| - Researched emerging technologies in AI to improve product offerings and customer experience.

-- [2016 - 2018] Machine Learning Engineer

| Company 123, Ho Chi Minh City, Vietnam

| - Developed deep learning models using PyTorch and TensorFlow for various applications.

- | - Collaborated with cross-functional teams to integrate models into production systems.
 - | - Conducted extensive model tuning and testing to achieve desired performance metrics.
-

Projects

- **Generative AI Chatbot**

Technologies: Python, PyTorch, Hugging Face

- Developed a generative AI chatbot to improve customer support. Enhanced natural language understanding capabilities, which resulted in a 25% reduction in average response time.

- **Recommendation System for E-commerce**

Technologies: SQL, TensorFlow, AWS

- Created a recommendation system that increased sales by analyzing user behavior and providing personalized product suggestions.

- **AI-Powered Fraud Detection System**

Technologies: Scikit-learn, PostgreSQL, Docker

- Built a real-time fraud detection system that decreased fraudulent transactions by 50% in the first three months of deployment.

Note: Education section has been omitted as per the requirements.
