PROFESSIONAL SUMMARY

Results-oriented AI Engineer with over 5 years of experience in designing, developing, and deploying AI-powered systems. Proficient in machine learning, deep learning, and large language models, with a strong focus on creating scalable AI solutions. Adept at collaborating with cross-functional teams to drive innovation and optimize performance across AI applications.

SKILLS

- **Programming Languages:** Python, SQL, Java, Go, JavaScript
- **ML/DL Frameworks:** PyTorch, TensorFlow, Scikit-learn
- **GenAI/LLM Tools:** Hugging Face, LangChain, LlamaIndex
- **Databases:** PostgreSQL, MongoDB, Redis, Elasticsearch
- **DevOps/MLOps:** Docker, Kubernetes, MLflow, Airflow
- **Cloud Platforms:** AWS, Azure, Google Cloud

WORK EXPERIENCE

Senior AI Engineer

XYZ Technologies, Hanoi, Vietnam

March 2019 – Present

- Designed and implemented machine learning solutions to improve customer experience, resulting in a 25% increase in user engagement.
- Led the development of a scalable AI infrastructure for deploying production-grade models using Docker and Kubernetes.
- Collaborated with data scientists and software engineers to optimize ML model performance and reduce inference latency by 30%.
- Developed and maintained MLOps pipelines, ensuring seamless integration with various cloud platforms (AWS, Azure).

AI Engineer

ABC Solutions, Ho Chi Minh City, Vietnam

January 2017 – February 2019

- Contributed to research and development of deep learning models for predictive analytics, enhancing forecasting accuracy by 20%.
- Developed APIs and services to facilitate deployment of AI solutions, including a

generative AI application utilizing LLMs.

- Built RAG systems that interacted with natural language queries, improving response times for automated customer support.
-

PROJECTS

Generative AI Application

- **Technologies:** Python, TensorFlow, Hugging Face
- Developed a generative AI application that creates human-like text responses, which received positive feedback from user testing and enhanced engagement metrics.

RAG System Implementation

- **Technologies:** Python, FastAPI, Redis
 - Designed and implemented a RAG system that utilized AI agents to provide instant query responses, reducing response time by 50%.
-

EDUCATION

Master of Science in Computer Science

University of Hanoi, Vietnam

Graduated: June 2016

Bachelor of Science in Information Technology

University of Ho Chi Minh City, Vietnam

Graduated: June 2014
