Work Experience

Backend Developer - Fresher Fulltime, Rovi Holdings – Tan Binh, HCM May 2024 – Present

- **Teamsize:** 8
- **Decription:** RoviTravel is a travel application providing flight tickets, hotel bookings, and tour packages, plus airport transfers and sightseeing tickets. Focused on three main areas: flights, hotels, and tours, it ensures a comprehensive and convenient travel experience.
- **Responsibilities:**
 - Took over and handled the entire Flight module of the RoviTravel project.
 - Implemented, integrated 3rd party APIs and optimized flight ticket search functionality for agents such as Vietravel, Vietjet and Vietnam Airlines for newer API versions.
 - Developed core features including booking, holding ticket, mapping condition ticket for different airlines in versions 2, 3 and flightcore.
 - Transitioned the payment flow from PAYNOW to PAYLATER.
 - Fixed bugs and updated Bamboo booking flight to pool requests.
 - Collaborating closely with front-end developers, QA testers, BAs, and project managers to deliver high-quality solutions.
- **Architecture and Techs:** Microservices architecture, .NET Core API, RabbitMQ, CQRS Pattern ...

Backend Developer - Intern, Kyanon Digital – Phu Nhuan, HCM Nov 2022 – Feb 2023

- Perform CRUD operations on the database.
- Support for developing small APIs Development.
- Write middleware to handle tasks like authentication, and error handling.
- Handle HTTP requests and generate appropriate responses.

Technologies and Skills

Languages: Csharp, Typescript, Javascript

Framework and Architecture: .NET Core API, Node-Expressjs

Database and Version Control: MSSQL, MySQL, PostgreSQL, Redis, Git

Message Broker and Orchestration: Apache Kafka, RabbitMQ, Docker

ORM: Entity Framework Core, TypeORM, Prisma, Sequelize

Architecture and Design Pattern: Microservices, Monolithic, CQRS Pattern, MVC Pattern, Repository Pattern

Others: Cloud DigitalOcean, Firebase Storage, Cloudinary, Search advanced with Elasticsearch (Nodejs), Memory, Redis Cache, HangFire

Soft Skills: Teamwork, Time Management

Foreign Languages: English - Certification of Achievement University Ielts 5.5

Education

NTT Institute of International Education, Information Technology 2018 to 2023

- Graduated: Bachelor's degree in Information Technology
- Major: Information Technology - Software Engineer
- Note: Waiting to receive a University Diploma

Personal Project

Bookings Airlines

Feb 2024 – May 2024

- **Teamsize:** 1
- **Description:** Microservices Backend API, providing features for ticket booking and passenger management. With flexibility and high performance, it optimizes user experience and efficiently manages passenger information.
- **Responsibilities:**
 - Develop, design database, system deploy, and maintain Microservices to manage passenger information, flight details, ticketing and implement new features to enhance user experience in the booking system.
 - Optimize performance and reliability of services through testing and source code optimization.
 - Integrate and ensure security for payment services
- **Technologies:**
 - Message Brokers: Apache Kafka
 - Framework and Architecture: NET Core 8 API (Csharp) + Nodejs (Typescript)
 - ORM and Database: TypeORM + Entity Framework Core, MSSQL, MySQL, PostgreSQL
 - Others: Ocelot API Gateway, Rate limit API, Quality of Service, Docker, AutoMapper, Nodemailer, DTO, Redis, Memory Cache, Stripe, Cloudinary, Schedule job HangFire, JwtBearer, Cloud DigitalOcean .v.v..
- **Architecture:** Microservices architecture.

Twitter API

Sep 2023 – Nov 2023

- **Teamsize:** 1
- **Description:** Provides a server-side application programming interface(API), The system will be designed to be scalable, allowing the addition of new microservices and handling increased workloads.
- **Responsibilities:**
 - Develop, design database, system deploy, set up environment for services, and maintain Microservices.
 - Optimize performance and reliability of services through testing and source code optimization.
 - Build authentication and user authorization mechanisms to ensure the security of information and protect user data
- **Technologies:**
 - Message Brokers: Apache Kafka
 - Framework: Nodejs (Typescript)
 - ORM and Database: SequelizeORM, Prisma ORM + MySQL, PostgreSQL
 - Others: Docker, Nodemailer, Redis, Elasticsearch, Firebase Storage, Swagger, Multer, JwtBearer ..v.v
- **Architecture:** Microservices architecture.
