INTERNSHIP EXPERIENCE

FPT Complex Đà Nẵng (03/2025 - 07/2025)

Project: System Migration for a Japanese Client

- Front-End: Vue 3
- Back-End: Java (Spring Boot)
- Database: Oracle
- Project Management: Jira

Responsibilities:

- Backend: Implemented business logic and automated script generation to ensure accuracy and efficiency. Collaborated with the team to improve and maintain project modules.
- Frontend: Developed UI features and connected APIs with backend modules, applied mapping for data binding and UI display.
- Version Control: Used GitLab for source control, Git Bash and Git Extensions for code management.
- Testing: Created Unit Test Cases (UTC), supported bug fixing during UTR and freeTest
