

DINH QUANG KHUONG Backend Developer

Software Developer

0888844634 - quangkhuong3010@gmail.com - Hà Nội

Summary

Backend Developer specializing in ASP.NET Core and Spring Boot, with experience building RESTful APIs, microservices, and real-time applications. Proficient in Redis, Kafka, SignalR, SQL Server, and PostgreSQL. Strong foundation in Clean Architecture, authentication/authorization, and distributed systems. Experienced in utilizing AI-powered development tools to improve coding efficiency, debugging, documentation, and software delivery. Passionate about building scalable backend systems and continuously learning new technologies.

Technical Skills

- **Technical Skill:** CSS, Linux, JavaScript, MySQL, HTML, MongoDB, Redis, SQL Server, Nginx, Docker, AWS, S3, CI/CD, ASP.NET Core, Spring Boot, NextJS, Kafka, PostgreSQL, CI/CD, Postman.
- **Soft skills:** Business Analysis: SRS, RDS, BRD, SignalR, EC2, RDS, Hangfire, RESTful APIs, Microservices, Clean Architecture, XUnit, Swagger.

Work Experience

Kaopiz Holdings | 09/2024 - 12/2024

Backend Developer

Responsibilities

- Developed backend services using Java Spring Boot and RESTful API architecture. Built and optimized APIs for user management and business modules. Designed and optimized SQL Server queries for large-scale data processing. Collaborated with frontend developers to integrate APIs and troubleshoot issues during testing. Participated in code reviews and backend performance optimization. Contributed to a CRM project for a Japanese client.

Technologies:

SQL Server, Java Spring Boot, Restful API, Restful Api

THANH DAT EDUCATION TRAINING AND SUPPORT COMPANY LIMITED | 01/2026 - 06/2026

Backend Developer

Responsibilities

- Developed microservices-based systems using ASP.NET Core and Clean Architecture. Implemented inter-service communication with Kafka and containerized services using Docker. Built CRM, HRM, Student, and Teacher modules with Redis caching to improve system performance. Integrated JWT/OIDC authentication and authorization mechanisms. Developed real-time chat features using SignalR. Built background jobs using Hangfire for scheduled processing tasks. Participated in data processing workflows for AI chatbot training systems.

Technologies:

Redis, Docker, ASP.NET Core, Kafka, PostgreSQL

Education

Son La High School for the Gifted | 01/2017 - 12/2021

Major: Chemistry Major

- Degree: High School

FPT University | 01/2021 - 12/2026

Major: Software Engineering

- Degree: Bachelor

Projects

Project: SEP490 Capstone Project Team – FPT University

Time: 2026-12-31

Description:

Recipe Sharing & Personalization Platform

- Developed backend APIs using ASP.NET Core Web API following Clean Architecture principles.
- Implemented JWT authentication, centralized exception handling, and API performance optimization.
- Applied Redis/In-Memory Cache to reduce database load and improve response time.
- Developed real-time notification features using SignalR.
- Built background processing jobs using Hangfire and Quartz.NET for scheduled tasks such as email sending and report generation.
- Designed and optimized relational databases using Entity Framework Core and SQL Server.

Technologies:

- ASP.NET Core Web API, Entity Framework Core, SQL Server, Redis, SignalR, Hangfire, Docker, Git
