

DINH THANH HOAI

hoaicn7@gmail.com | 0352767862 | github.com/eriskcn | Ha Noi, Vietnam

EDUCATION

Thang Long University, Ha Noi — *B.Sc. in Information Technology* GPA: 8.5/10 (Distinction) 2021 - 2025

PROFESSIONAL EXPERIENCE

Digital Technology Solutions — *Software Engineer (Banking Domain)* 06/2025 - Present

- Backend development:** Built and maintained microservices for digital banking products using **ASP.NET Core** and Entity Framework Core, integrating with SQL Server, PostgreSQL, and Oracle databases. Designed RESTful APIs and implemented complex business logic for financial transaction processing.
- Event-driven architecture:** Implemented asynchronous communication between services using **RabbitMQ** with publish/subscribe patterns, including retry mechanisms, dead-letter queues, and idempotent consumers to ensure reliable message delivery.
- Full-stack contribution:** Built responsive user interfaces with **React.js** and cross-platform mobile components with .NET MAUI, ensuring consistent user experience across web and mobile platforms.
- DevOps & observability:** Deployed and managed containerized applications using **Docker** and **Kubernetes**. Set up monitoring with Prometheus and Grafana, and utilized Elasticsearch for logging and search, Hazelcast for caching, and MinIO for object storage.
- Production ownership:** Led production go-lives and provided ongoing support — investigating errors, debugging distributed systems, and shipping hotfixes on UAT and production environments. Maintained CI/CD pipelines for automated build, test, and deployment.
- Client collaboration:** Worked directly with international clients to clarify feature requirements, coordinate release schedules, and manage expectations throughout the development lifecycle.

Thanglong Inc. — *Software Engineer (HR & Recruitment Domain)* 05/2024 - 03/2025

- Developed backend features for a recruitment and HR management system using **ASP.NET Core** and EF Core, with SQL Server and Oracle as databases. Built and maintained user-facing modules with **Angular**, serving both internal HR workflows and external candidates.
- Promoted from intern to full-time** within 4 months based on performance. Took increasing ownership of feature development, bug fixes, and code reviews across the team.
- Refactored core data access layer to reduce redundant queries, optimized complex SQL joins, and improved overall system responsiveness.

TECHNICAL SKILLS

Backend	C#, ASP.NET Core, Entity Framework Core, REST API, LINQ
Frontend	React.js, Angular, JavaScript, HTML, CSS, Tailwind CSS
Mobile	.NET MAUI
Database & Cache	SQL Server, PostgreSQL, Oracle, Elasticsearch, Hazelcast
DevOps & Infra	Docker, Kubernetes, RabbitMQ, MinIO, Prometheus, Grafana, CI/CD
Tools	Git, Claude Code, Antigravity

STRENGTHS & ADDITIONAL

- Systematic debugging & refactoring:** Proven ability to investigate and resolve complex issues in data-consistency-sensitive systems spanning multiple databases and microservices.
- Full-stack & infrastructure mindset:** Comfortable across the entire stack — from backend domain logic and EF Core data modeling to React/Angular interfaces and infrastructure tooling (Docker, Kubernetes, observability).
- Self-directed & proactive:** Built custom internal tooling and automation to improve team workflows, including developer tooling and monitoring dashboards.
- International communication:** Experienced in working with global stakeholders on feature scoping, timelines, and production issue resolution.

Languages: Vietnamese (Native), English (Professional working proficiency) | **Interests:** System observability, AI-assisted development, open-source tooling
