PERSONAL INFORMATION

My photo

Name : Lê Việt Cường
Sex : Male
Date of Birth : 29/12/1989
Marital Status : Married
Address : Van Canh - Son Dong - Hanoi
Mobile : 0979 885 297
Email : vietcuong2912@gmail.com
LinkedIn : <https://www.linkedin.com/in/vietcuong-le-44040041b>

EDUCATIONAL BACKGROUND

- **2005 – 2008:** Learned at Chuyen Son La high school.
- **2008 – 2013:** Studied at University of Engineering and Technology - Vietnam National University. Major: Information Technology

ADDITIONAL SKILLS

- **English:** good for communication & working
- **Soft Skill Certification** (presentation, working in group, building plan, decision making...)
- **IBM Certification** about Object Oriented Analysis and Design
- **Hardware & software:** setup and config computer hardware and software

EXPERIENCE

With 12 years of experience in C# software development, I have designed, developed, and maintained enterprise-scale applications using:

- BackEnd: .NET Framework, ASP NET Core, WPF, Blazor, Winform...
- FrontEnd: React.js, HTML, CSS, JS, Bootstrap, Ajax, SASS
- DevOps: Git, Docker, Jenkins, Gitlab, IIS
- Database: Oracle, SQL server, PostgreSQL, MySQL

- Service Communication: RESTful, gRPC, WCF and SOAP, SignalR
- Test API: Postman, Swagger, GrpcUI
- Architecture: MVC, MVVM, N-tier, Distributed Systems
- Others: AI with Copilot. Claude, Oauth, ASP.NET Core Identity , EF Core, Log4net, Nlog. Middleware, Exception handler, VSTO, LawgueJSON, Newtonsoft, XSL-FO, Sonarqube...

Currently, I serve as a Leader, leading a team of five developers in an Agile Scrum environment. My responsibilities include source code structure & DB design, review code, mentor member, optimizing & turning DB. We can work in any part of the software development lifecycle.

Throughout my career, I have worked on large systems involving high-volume data processing and complex business. I have also collaborated within large teams with 80 members.

FUTURE DIRECTION

I am seeking a new opportunity where I can embrace new challenges, continue my professional growth, and contribute to innovative solutions in an AI-driven era.

My career goals are:

- To improve high-quality software development and mentor team members.
- To learn more about AI and AI agents, and apply these technologies to create practical value for businesses and life.
- To continuously learn, improve my technical and leadership skills.

WORKING PROCESS

The summary of my working process:

- **6/2020 – now:** Work at NTQ Solution, migrate and develop system & tools, optimize performance, SQL, design DB, manage & deploy server & delivery for customer, solve problem and technical issue, lead team & review code, use AI for Coding

<i>Time</i>	<i>Project</i>	<i>Detail</i>
-------------	----------------	---------------

10/2024 -> now	WX-Fintegra system	Description: Migrate from NX-system to WX-system (manage finance report) and develop Fintegra Module (manage finance data & calculate finance index) Team size: 80 people Responsibilities: • Migrate and develop from WPF to Web system using Grpc .Net • Create API for WX & Fintegra module • Create Pdf, HTML report, Job • Solve technical issues & optimize performance • Review code & lead team Technologies: • GRPC backend & ReactJS, NextJS frontend, LawgueJson, XSL-FO, GRPCUI, Log4Net, Jenkin, SonaQube, Corpilot & AI. Newtonsoft, git... Achievements: • Work with big projects from the start with many problems & limits. • Improve tech skills because of coding quality requirements and difficult business logic
05/2022 -> 09/2024	NX system	Description: NX is a big system about managing finance reports and managing finance data following international standards (JP, US, IFRS). This system is used by half of all Japanese stock companies. Team size: 20 people Responsibilities: • Create new web app manage document for a type of user • Working with server, design DB, Job, report • Create API, DLL to using in other system • Design Basic Design Document Technologies: ☛ WPF, Asp MVC .Net, VSTO, XML, Winform, Oracle, Procedure, SignalR, git Achievements: • Work with big system, optimize performance necessary • Work with big team with more difficult task & lead small team
03/2021 -> 05/2022	Disclosure Document Check & Tool	Description: Analysis syntax of finance document to find finance account & amount number to check the accuracy of numbers. Then export the result and create related tools. After that we integrate them to manage the document system. Team size: 8 people Responsibilities: • Develop system (MVC .Net) & tools (Search XML data doc, AddIn MsWord) • Setting job to run check data • Working with server, design DB • Create API, DLL for import to other system • Design Basic Design Document & create solution suggestion for customer • Review code Technologies: • MVC .Net,, mecab, cabocha, VSTO, XML, HTML, CSS, JS, git Achievements: • Design DB & design analysis • Become a leader and do some manage task

6/2020 -> 3/2021	Ecobill	Description: manage bill system Team size: 4 people Responsibilities: • Develop portal, deploy multi tenant • Create & Update SQL, procedure for customer • Working with server using AWS and Asteria Technologies: Visual Studio, Asteria, SQL server, Oracle, PostgreSQL Achievements: Experience in SQL & cloud, server
---------------------	----------------	--

- **3/2018 – 5/2020:** Work in Tinh Van Group – TVS (Tinh Van Solution)

<i>Time</i>	<i>Project</i>	<i>Detail</i>
3/2018 -> 5/2020	Ministry of Public Security Portal	Description: Develop admin page & portal for Ministry of Public Security (news, documents, media, organization, links, contacts & management) Team size: 10 people Responsibilities: • Develop API for portal & admin page • Layout HTML and graphic design • Working with server & migrate old data • Build data tool for migrate Technologies: Asp .NET, HTML5, CSS, JS, VideoJS, Bootstrap, AJAX, SQL server... Achievements: Work with video, photos and big file data & performance request for e-magazine

- **6/2015 – 2/2018:** Work in FPT Software – FSU01 & FSU11

<i>Time</i>	<i>Project</i>	<i>Detail</i>
09/2017 -> 02/2018	Police Academy Examination Management	Description: Create web app and winform app to manage examinations. Team size: 5 people Project size: 15 MM Responsibilities: • Build apps, create databases, design. • Config server. Technologies: .NET, MVC, SQL server, Javascript, HTML5, EF Core...
03/2016 -> 08/2017	Develop and migrate Lotus Notes to Sharepoint	Description: Develop Sharepoint apps and migrate Lotus Notes to Sharepoint Customer: DUPONT Team size: 50 people Project size: 300 MM Responsibilities: • Migrate data • Create tool to develop, test • Layout HTML, CSS • Coding apps with sharepoint designer Technologies: • .NET, HTML , JS, CSS, Sharepoint, SQL server
06/2015 -> 02/2016	TSS En SmartBook	Description: Maintain Smart Book for pupils in Japan. (primary and secondary school) Team size: 50 people

		Project size: 200 MM Responsibilities: • Maintain tool for Smartbook • Layout HTML Technologies: Javascript, HTML5, CSS, JS, Adobe Suite, Canvas & SVG...
--	--	---

- **9/2013 – 8/2015:** Work in VNPT Ha Noi

<i>Time</i>	<i>Project</i>	<i>Detail</i>
09/2014 -> 08/2015	Web Service Gateway	Description: Create and maintain Webservice Gateway Customer: VNPT Team size: 3 people Responsibilities: • Provide web service on the gateway • Develop new module • Maintain system • Manage database Technologies: • .NET, HTML, JS, CSS, SOAPUI
09/2013 -> 08/2014	Repairing Equipment System Management	Description: Handle repairing equipment system management Customer: VNPT Team size: 7 people Responsibilities: • Develop new module • Maintain system • Manage database Technologies: • .NET, HTML, JS, CSS, Ajax

STRONGNESS AND WEAKNESS

- **Strongness:**
 - o Having experience as a team lead & senior developer.
 - o Good at some database systems: SQL server, Oracle , PostgreSQL
 - o Can speak, write and read comprehension in English.
 - o Good at work in a group and alone.
 - o Responsible for working with high enthusiasm and passion.
- **Weakness:**
 - o I haven't changed companies in a long time so not much new technology I have ever approached.
